Title: Consider recommendation from Planning Commission to approve applications for Annexation (10PLN-19), Prezoning (10PLN-21), General Plan Amendment (10PLN-20), and Development Review (10DRC-19) for Milco Project located south of Whispering Pines Lane, west of Cambridge Court (APN’s 09-680-49, 40 and 53).

Agenda: Public Hearing

Recommended Motion: After conducting the public hearing: 1) waive the reading of the ordinance in its entirety and read by title only, 2) introduce ordinance prezoning 7.73 acres to M-1, and 3) adopt resolution No. 2011-51 approving the Annexation, General Plan Amendment and Development Review applications, and adopting the Mitigated Negative Declaration pursuant to the provisions of the California Environmental Quality Act (CEQA).

Background: On May 17, 2011, the Planning Commission recommended, by a unanimous 5-0 vote, the City Council approve the Milco Development project. The attached Planning Commission report provides a more detailed description of the project, background, and the environmental review. The project consists of the following four applications:

1. An annexation of 7.73 acres into the City and Nevada Irrigation Water District,
2. A prezoning of the entire 7.73 acres from the County’s BP zoning district to the City’s M-1 (Light Industrial) zoning district,
3. A general plan amendment for modification of the General Plan designation from BP (Business Park) to M-1 (Light Industrial), and

The Planning Commission determined all the project’s environmental impacts will be mitigated, and the project is consistent with the City’s 2020 General Plan, Sphere of Influence Plan, Development Code, and Design Guidelines.

ORDINANCE NUMBER ___ N. S.

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF GRASS VALLEY APPROVING A ZONING MAP AMENDMENT PREZONING 7.73 ACRES TO M-1 (LIGHT INDUSTRIAL) FOR ASSESSOR’S PARCEL NUMBERS 09-680-49, 50 AND 53.

BE IT ORDAINED BY THE COUNCIL OF THE CITY OF GRASS VALLEY AS FOLLOWS:

SECTION 1. That the City of Grass Valley Zoning Map is hereby amended as shown in Exhibit “A”.

SECTION 2. In compliance with Chapter 17.94 of the Grass Development Code, the City Council adopts the following findings in support of this amendment to the Zoning Map:

1. The proposed amendment to Prezone to M-1 will be consistent with the General Plan Amendment. Rationale: The proposed M-1 zoning is the consistent with the adjoining zoning designation to the south and is not considered part of the Whispering Pines Specific Plan. The zoning designation of M-1 would also be consistent with the General Plan designation for the 7.73 acre site.

2. The proposed amendment would not be detrimental to the public interest, health, safety, convenience, or welfare of the City. Rationale: The proposed prezoning is the appropriate zoning to implement the City’s General Plan. As demonstrated in the public record for the entire project, the proposal will not be detrimental to the public interest, health, safety, convenience, or welfare of the City.

3. The affected site is physically suitable in terms of design, location, shape, size, operating characteristics, and the provision of public and emergency vehicle (e.g., fire and medical) access and public services and utilities (e.g., fire protection, police protection, potable water, schools, solid waste collection and disposal, storm drainage, wastewater collection, treatment, and disposal, etc.), to ensure that the proposed or anticipated uses and/or development would not endanger, jeopardize, or otherwise constitute a hazard to the property or improvements in the vicinity in which the property is located. Rationale: The project site is planned to have access to full public services, and is designed to comply with all applicable public service standards. The proposed project is designed to avoid sensitive resources and constraints on the property, and will not create a hazard to the property or adjacent properties.
SECTION 3. The City Council amends the Zoning Map as shown in Exhibit “A” through the approval of this ordinance.

SECTION 4. This ordinance shall take effect thirty (30) days from and after the date of its adoption and a summary of said ordinance shall be published once within fifteen (15) days upon its passage and adoption in The Union, a newspaper of general circulation printed and published in the Grass Valley Area.

INTRODUCED and first read on the 28th day of June, 2011

PASSED AND ADOPTED this 12th day of July, 2011, by the following vote:

PUBLISH DATE: ____________________________
Attachment 2
RESOLUTION NO. 2011-51

WHEREAS, John Miller, Milco Development, submitted the following application packet: 1) Annexation Application 10PLN-19 to annex the 7.73 acre Milco Project site; 2) General Plan Amendment 10PLN-21 to amend the General Plan designation from BP (Business Park) to M-I (Light Industrial); 3) Prezone Application 10PLN-20 to Prezone the Milco Development property to the (M-1) Light Industrial Zoning District and; and 4) Development Review Application 10DRC-19, and

WHEREAS, the properties are contiguous to the existing City boundaries; and

WHEREAS, the properties are located within the recently adopted Grass Valley Sphere of Influence “Near-Term Planning Horizon”, and

WHEREAS, the proposed annexation is consistent with the City’s Sphere of Influence Plan, and

WHEREAS, the City of Grass Valley desires to initiate proceedings pursuant to the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000, commencing with Section 56000 of the California Government Code, for annexation of the project area, and

WHEREAS, it is the City’s desire that the proposed annexation be subject to the following terms and conditions:

1. That this annexation is subject to the terms of the MASTER TAX EXCHANGE AGREEMENT, entered into by the City Council and Board of Supervisors on October 9, 2001.

2. That the area to be annexed to the City be detached from Nevada County Consolidated Fire District.

3. That the area to be annexed to the City also be annexed into the Nevada Irrigation Water Service District.
4. That the parcels to be annexed to the City shall be subject to the levying or fixing and collection of any previously authorized taxes, benefit assessments, fees or charges of the City.

WHEREAS, as noted in the May 17, 2011, Staff Report to the Planning Commission and Attachment (Initial Study and Mitigated Negative) of said report, the proposed General Plan Amendment to change the land use to M-1 as shown in Exhibit “A” is consistent with the goals, objectives, and policies established in the 2020 General Plan, and

WHEREAS, Section 1.08.010 of the Grass Valley Municipal Code requires all proposed annexations to the City to be prezoned or preplanned by the Planning Commission prior to City Council authorizing submittal of an application to the Local Agency Formation Commission, and

WHEREAS, the proposed prezone of the Milco Project site to the M-1 Light Industrial Zoning Designation is appropriate and consistent with the City’s General Plan, and

WHEREAS, the City completed the Initial Study in compliance with the California Environmental Quality Act and concluded that the project may have potentially significant impacts on the environment. Mitigation measures are included in the project to fully mitigate all potentially significant impacts on the environment. The City circulated the proposed Mitigated Negative Declaration for public review from March 2, 2011 to April 1, 2011 and has not received any comments or substantial evidence that the project will have a significant effect on the environment; and

WHEREAS, upon conclusion of the public review period, the City prepared an Addendum to clarify and make insignificant modifications and determined the changes will not lead to any new potential impacts to the environment; and

WHEREAS, the City Council has independently reviewed, analyzed and considered the proposed Mitigated Negative Declaration prior to making its decision on this project, and the Mitigated Negative Declaration reflects the independent judgment of the City of Grass Valley.

WHEREAS, on April 26, 2011, the Development Review Committee reviewed the project and recommended approval by the Planning Commission for the Milco Development Project, and

WHEREAS, on May 17, 2011, the Planning Commission conducted a duly noticed public hearing on the General Plan Amendment, Annexation, Prezone and
Development Review applications and recommended adoption of the Mitigated Negative Declaration, and

NOW, THEREFORE BE IT RESOLVED that the City Council of the City of Grass Valley does hereby adopt the Mitigated Negative Declaration and approve Annexation 10PLN-19, General Amendment 10PLN-21, Prezone 10PLN-20, and Development Review 10DRC-19 applications subject to the findings and conditions in Exhibit “B”, and

BE IT FURTHER RESOLVED that the City Council does hereby adopt the mitigation measures and reporting program listed in Exhibit "C" and these mitigation measure be included as conditions of approval for the Milco Development project and be made a part of this approving action.

BE IT FURTHER RESOLVED that the City Council of the City of Grass Valley affirms as follows:

1. That the foregoing statements are true and correct.

2. That this Resolution of Application is hereby adopted and approved by the City Council of the City of Grass Valley, and the Local Agency Formation Commission of Nevada County is hereby requested to take proceedings for the annexation of the territory, according to the terms and conditions stated above and in the manner provided by the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000.

3. That the City Clerk shall file a certified copy of this resolution with the Executive Officer of LAFCO pursuant to Section 56802 of the Government Code.

4. That the conditions of approval attached as Exhibit “B” for this project will become effective upon the annexation of this property to the City of Grass Valley.

ADOPTED as a Resolution of the City Council of the City of Grass Valley at a meeting on June 28, 2011.

TOWNSHIP 16 NORTHEAST, RANGE 8 EAST, M.D.M.
NEVADA COUNTY, CALIFORNIA

CITY OF GRASS VALLEY
PLANNING DIVISION
SEP 13 2010
Exhibit “B”
Findings of Approval- Milco Development

1. The City received the application packet for the Milco Project on July 21, 2010. After the City determined the applications were incomplete, the City received additional information and the project was deemed complete on December 28, 2010.

2. The City completed the Initial Study in compliance with the California Environmental Quality Act and concluded that the project may have potentially significant impacts on the environment. Mitigation measures were incorporated into the project to fully mitigate all potentially significant impacts on the environment. The City circulated the proposed Mitigated Negative Declaration for public review (from March 2, 2011 to April 1, 2011) and received comments from the Northern Sierra Air Quality Management District and Nevada Irrigation District.

3. Since the conclusion of the public review period for the proposed Negative Declaration, the City prepared an Addendum to clarify and make insignificant modifications and determined the changes will not lead to any new potential impacts to the environment.

4. The City Council has independently reviewed, analyzed and considered the proposed Mitigated Negative Declaration prior to making its decision on this project, and the Mitigated Negative Declaration reflects the independent judgment of the City of Grass Valley.

8. The proposed amendment to the City's General Plan is consistent with the surrounding land uses.

9. The project will require Annexation into the City of Grass Valley and Nevada Irrigation District Water Service Area.

10. The proposed Zoning designation of M-1 will be consistent with the adjoining properties within the Whispering Pines area.

11. The project, as conditioned, is consistent with the applicable sections and development standards in the Grass Valley Development Code.
12. The project complies with the general principles listed in the Community Design Guidelines and the goals and policies in the Community Design Element.

13. That the site is physically suitable for the type of development.

14. The project can be adequately and reasonably served by public facilities, services and utilities.

15. The location, size, planning concepts, design features, and operating characteristics of the project are and will be compatible with the character of the site and the land uses and development intended for the surrounding area by the General Plan.

16. The establishment, maintenance, or operation of the use would not, under the circumstances be detrimental to the health, safety, or general welfare of persons residing or working in the neighborhood of the proposed use, or detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the City.
Conditions of Approval - Milco Development

1. All plans shall be implemented in accordance with the plans approved by the Grass Valley Planning Commission for Development Review Application 10DRC-19, Annexation 10PLN-19, Prezone 10PLN-20, and General Plan Amendment 10PLN-21 unless changes are approved by the Commission prior to commencing such changes. Minor changes may be approved by the Community Development Department as determined appropriate by the Community Development Director.

2. The applicant agrees to defend, indemnify, and hold harmless the City in any action or proceeding brought against the City to void or annul this discretionary land use approval.

3. The applicant shall file a Notice of Determination, including payment of associated fees, in the office of the County Clerk within (5) days after the approval date of the project. The applicant shall provide a copy of the notice to the City.

4. If construction of the project has not commenced within one (1) year from the date of approval, or by April 26, 2012, the Development Review application approval shall become null and void. For the purposes of this condition, the term "commencement" means the obtaining of a City Building Permit and the initiation of construction activity on the site.

5. As part of the annexation application submitted to the Local Agency Formation Commission, the applicant shall apply to Nevada Irrigation District for Annexation into the water service area for parcels 09-680-50 & 53.

PRIOR TO ISSUANCE OF A GRADING PERMIT, THE FOLLOWING CONDITIONS SHALL BE SATISFIED:

6. The applicant shall submit to the City Engineer for review and approval, an improvements and grading plan prepared by a Registered Civil Engineer; shall obtain a Grading Permit; and shall pay all appropriate fees for plan check and inspection. The grading and improvement plans shall include but not be limited to roadway/driveway/parking lot slopes and elevations, curb, gutters, sidewalks, striping and signing, paving, water and sewer pipelines, storm drains, street/parking lot lights, accessible access from the sidewalk to the buildings and from the accessible parking spaces to the buildings, retaining walls, and all easements, in accordance with City Improvement Standards.

7. The project developer shall adhere to the following tree protection measure as noted on the plans during any construction activities for this project:
All trees to be saved shall be enclosed by a construction barrier placed around the dripline zone of the tree. The construction barrier shall consist of four-foot tall mesh safety fencing in a bright color. The fencing shall be tied to six-foot tall metal poles spaced a maximum of twenty feet apart. Each pole shall be placed with two feet below the surface of the ground.

8. The applicant shall:
   i) Obtain the applicable harvest document(s) from the California Department of Forestry and Fire Protection and submit a copy of the approved document to the City. Either:
      a. Less Than 3 Acre Conversion Exemption. Any project with less than 3 acres of land disturbance may qualify (see 14 CCR 1104.1 (a)(2) for conditions).
      b. Timberland Conversion (PRC4621) and Timber Harvest Plan (PRC.4581). Any project with 3 acres or greater or that do not meet the conditions in 14 CCR 1104.1 (a)(2).
   ii) Obtain a tree removal permit from the Grass Valley Public Works Department.

9. The applicant shall submit to the City Engineer for review and approval two copies of a detailed Soils Engineering Report and Engineering Geology Report certified by a Civil Engineer registered in the State of California. In addition to the California Building Code requirements, the report shall specify the pavement structural sections for the proposed roadways in relation to the proposed traffic indexes. The improvements and grading plans shall incorporate the recommendations of the approved Soils Engineering Report and Engineering Geology Report. The project developer shall retain a civil engineer, soils engineer, and engineering geologist to provide professional inspection of the grading operations. If work is observed as not being in compliance with the California Building Code and the approved improvements and grading plans, the discrepancies shall be reported immediately in writing to the permittee, the building official, and the Engineering Division.

10. The applicant shall prepare a detailed engineering plan that incorporates recommendations identified in the Preliminary Geotechnical Report dated November 8, 2010. Geotechnical measures shall be incorporated into project grading and construction. A Geotechnical Engineer shall be retained for observation during grading operations to ensure implementation of those recommendations included within the Geotechnical Report. (MM5)

11. If any retaining walls or other wall structures equal to or greater than four feet in height (from the base of the footing to the top of the wall) are identified on the grading/improvement plans, the applicant shall:
   a. Place a note on the grading/improvement plans stating that any walls equal to or greater than four feet in height will require a Building Permit prior to being constructed.
b. Submit design calculations for the walls for review and acceptance.

c. If the proposed walls are to be constructed against a cut slope that cannot be graded back per the California Building Code, submit:

1. A signed and stamped letter from a Licensed Civil Engineer or Geotechnical Engineer identifying a temporary shoring plan and how the cut slopes for the walls will be protected from the weather during construction.

2. A signed and stamped letter from a Licensed Civil Engineer or Geotechnical Engineer stating that a copy of the required OSHA Permit will be supplied to the City prior to any excavation on the site and that a qualified OSHA Approved Inspector or Professional Civil Engineer will:
   1) Be onsite during excavation for and construction of the retaining walls;
   2) Be onsite at least once a day during inclement weather; and 3) Will submit daily reports to the City.

12. The applicant shall submit a Storm Water Pollution Prevention Plan (SWPPP) to the City for acceptance, file a Notice of Intent with the California Water Quality Control Board and comply with all provisions of the Clean Water Act. The applicant shall submit the Waste Discharge Identification (WDID) number, issued by the state, to the Engineering Division.

13. The applicant shall submit to the City Engineer for review and approval, drainage plans, hydrologic, and hydraulic calculations prepared by a Registered Civil Engineer. The drainage plans and calculations shall indicate the following conditions before and after development:

   Quantities of water, water flow rates, major watercourses, drainage areas and patterns, diversions, collection systems, flood hazard areas, sumps and drainage courses. Hydrology shall be in accordance with the City of Grass Valley Improvement Standards and Specifications and Master Plan Drainage Standards.

   In order to preclude significant impact to downstream properties, the applicant shall limit the storm water run-off after development to the pre-development conditions for the 10, 25, and 100 year storm events. The site drainage system shall incorporate water/oil separators, or other approved methods to prevent site contaminants from impacting downstream watersheds.

14. A detailed grading, permanent erosion control and landscaping plan shall be submitted for review and approval by the Engineering Division prior to commencing grading. Erosion control measures shall be implemented in accordance with the approved plans. Any expenses made by the City to
enforce the required erosion control measures will be paid by the deposit.

15. The applicant shall submit a Dust Mitigation Plan for review and approval by the Northern Sierra Air Quality Management District and City Engineer. Dust mitigation measures shall be implemented in accordance with the approved Dust Mitigation Plan. The dust mitigation plan shall include the following:

a. The applicant shall be responsible for ensuring that all adequate dust control measures are implemented in a timely manner during all phases of project development and construction.

b. All material excavated, stockpiled, or graded shall be sufficiently watered, treated, or covered to prevent dust from leaving the property boundaries and causing a public nuisance or a violation of an ambient air standard. Watering should occur at least twice daily, with complete site coverage.

c. All land clearing, grading, earth moving, or excavation activities on the project shall be suspended as necessary to prevent excessive windblown dust when winds are expected to exceed 20 mph.

d. All inactive portions of the development site shall be covered, seeded, or watered until a suitable cover is established. Alternatively, the applicant shall be responsible for applying City approved non-toxic soil stabilizers (according to manufactures specifications) to all inactive construction areas (previously graded areas which remain inactive for 96 hours) in accordance with the local grading ordinance.

e. All areas with vehicle traffic shall be watered or have dust palliative applied as necessary for regular stabilization of dust emissions.

f. All material transported off-site shall be either sufficiently watered or securely covered to prevent public nuisance.

g. Paved streets adjacent to the project shall be swept at the end of each day, or as required to remove excessive accumulations of silt and/or mud which may have resulted from activities at the project site.

h. No burning of waste material or vegetation shall take place on-site unless deemed infeasible by the District. Alternatives to burning include chipping, mulching or converting to biomass. (MM1)

16. The applicant shall submit sewer calculations for the proposed development and any calculations necessary to verify the existing sewer system's ability to carry the additional flow created by the development.

17. The applicant shall provide information that Waste Management of Grass Valley (WMGV) has approved the plan for the trash/recycling container. The trash/recycling container shall be of adequate size to accommodate the trash and recycling needs of proposed use. The plan shall also be designed for adequate access and servicing by WMGV. The applicant shall provide verification to the Community Services Department that the trash/recycling container has been approved by WMGV. The trash/recycling container shall be installed in accordance with the approved plan prior to occupancy of the building.
18. The improvements and grading plans shall be signed by all other jurisdictional agencies involved (i.e. NID), prior to receiving City Engineer approval.

19. Per the Development Code, the Grading Permit shall expire one (1) year from the effective date of the permit unless an extension is granted by the City Engineer (for up to 180 days).

20. The applicant shall submit final landscape and irrigation plans, prepared by a licensed landscape architect, for review and approval by the Planning and Engineering Divisions. Landscaping design shall comply with all provisions of the City’s Water Efficient Landscape Ordinance. The landscape plan shall include evidence that the project provides 20% coverage of the site with landscaping and 50% shade coverage of the parking areas. The plans shall also indicate plantings of vines and shrubs for the retaining wall on the southwest side.

PRIOR TO INITIATING GRADING AND/OR CONSTRUCTION OF THE SITE IMPROVEMENTS FOR THE PROJECT, THE DEVELOPER SHALL INITIATE THE FOLLOWING:

21. That prior to any work being conducted within the State, County or City right-of-way, the applicant shall obtain an Encroachment Permit from the appropriate Agency.

22. A minimum of forty-eight (48) hours prior to commencement of grading activities, the developer’s contractor shall notify both the Planning and Engineering Divisions of the intent to begin grading operations. Prior to notification, all grade stakes shall be in place identifying limits of all cut and fill activities. After notification, Planning and Engineering staff shall be provided the opportunity to field review the grading limits to ensure conformity with the approved improvement and grading plans. If differences are noted in the field, grading activities shall be delayed until the issues are resolved.

23. Placement of construction fencing around all trees designated to be preserved in the project.

24. Submittal of two copies to the Engineering Division of the signed improvement/grading plans.

25. Pre-construction surveys for nesting raptors should be conducted prior to construction activities between March 1 and September 30. Surveys should be completed no later than 7 days prior to commencement of grading activity. If a legally-protected species nest is located in a tree designated for removal, removal shall be delayed until after September 30th or until the adults and young
are no longer dependent on the nest which will need to be determined by a biologist. If no raptor nests are detected, construction activities may proceed with no further mitigation. (MM3)

PRIOR TO ISSUANCE OF BUILDING PERMIT(S):

26. Submit for review and approval by the Fire Department, a Fire Safety Plan.

27. Prior to the issuance of building permits, the following items shall be approved and/or verified by the Fire Department:

a. Required fire flow for these buildings could not be determined. Provide type of construction for the buildings. After fire flow has been determined, the local water agency (NID) shall submit letter stating the ability to meet require fire flow.

b. Depending on construction type and fire flow, a Fire Sprinkler System may be required for Building #1. Sprinklers will be required in buildings #2 and #3 to meet NFPA standards. Separate submittals will be required to the Fire Department.

c. A Fire Alarm System for the monitoring of the Fire Suppression System shall be required for buildings #2 and #3 and may be required in building #1. All plans and works shall be subject to the California State Contractors License Law and requirements.

d. The number of fire hydrants for this project shall be determined once fire flow for the structures has been calculated.

e. Fire apparatus access roads shall have unobstructed width of not less than 20 feet and unobstructed vertical clearance of not less than 13 feet 6 inches.

f. Approved address numbers are to be placed on the building(s) in such a position as to be clearly visible and legible from the street providing access to the building. Address numbers shall sharply contrast with their background and shall comply with the following minimum height and width dimensions based on the location of the address numbers in relation to the street providing access to the building:

<table>
<thead>
<tr>
<th>Distance</th>
<th>Height</th>
<th>Width</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-20 feet</td>
<td>4 inches</td>
<td>3/4-inch</td>
</tr>
<tr>
<td>21-35 feet</td>
<td>6 inches</td>
<td>1-inch</td>
</tr>
<tr>
<td>36-49 feet</td>
<td>9 inches</td>
<td>1-1/4 inches</td>
</tr>
<tr>
<td>50 feet or more</td>
<td>12 inches</td>
<td>1-1/2 inches</td>
</tr>
</tbody>
</table>

g. Fire flow calculations shall be submitted to this department, along with the civil plan submittals.

h. Dead-end fire apparatus access roads in excess of 150 feet shall be provided with an approved area for turning around the fire apparatus. A
dead-end roadway is shown adjacent to building #2. An approved turn around shall be provided for the fire apparatus.

28. All buildings shall include energy efficient indoor and outdoor lighting and light colored “cool” roofs.
   a. At least 75% of the landscaping within the open space and common areas shall include native and/or drought tolerant landscaping. Shade trees shall be provided at a rate of one for every 25 linear feet of landscaped area.
   b. Size & orientation of windows & doors shall be designed to take advantage of sun, shade & wind conditions to minimize the requirement on mechanical heating and cooling systems. Site buildings to take advantage of solar orientation. Proper building orientation facilitates the use of natural daylight.
   c. Incorporate Natural Cooling by utilizing shading from tree canopies (for east & west facing glass). Any combination of natural cooling techniques can be used to reduce overheating, reduce the need for air conditioning and reduce energy.
   d. All windows shall be Energy Star rated.
   e. Upgrade insulation to exceed California Title 24 requirements (MM6)

29. The following items shall be submitted as part of the Building Permit Application package and be subject to the review and approval of the Planning Department:
   a. Building and appurtenant structure exterior colors and materials. Paint chips of the proposed color scheme shall be included.
   b. Utility meter, transformer, irrigation control unit location and screening.

All of the aforementioned plans shall incorporate all of the design specifications and criteria as shown on the site plan approved and modified by the City Council on June 28, 2011, unless otherwise modified as specified by condition # 1.

DURING CONSTRUCTION, THE FOLLOWING CONDITIONS SHALL APPLY:

30. If grading or other construction operations unearth archeological or historical Artifacts or resources, construction activities shall cease. The Planning Division shall be notified of the extent and location of discovered materials so that they may be recorded by a qualified archaeologist. Disposition of artifacts shall comply with state and federal laws. A note of this requirement shall be clearly delineated on the grading and building plans of the project. (MM4)

31. If any hazardous waste is encountered during the construction of this project, all work shall be immediately stopped and the Nevada County Environmental Health Department, the Fire Department, the Police Department, and the City Inspector
shall be notified immediately. Work shall not proceed until clearance has been issued by all of these agencies.

32. The applicant shall comply with the terms of the nationwide Section 404 permit issued by the U.S. Army Corps of Engineers. This shall include obtaining a Section 401 water quality certification from the Regional Water Quality Control Board and a Section 1602 permit from the Department of Fish and Game. The project shall implement mitigation as approved by the agencies. Such mitigation actions shall include appropriate temporary and permanent BMP’s to protect water quality, as well as compensatory mitigation for the loss of habitat by means of payment of in-lieu fees, construction or enhancement of habitat, or a combination of these actions. (MM2)

33. Prior to final preparation of the subgrade and placement of pavement base materials, all underground utilities shall be installed and service connections stubbed out behind the hardscape improvement. Public utilities, Cable TV, sanitary sewers, and water lines, shall be installed in a manner which will not disturb the street pavement, curb, gutter and sidewalk, when future service connections or extensions are made.

34. The developer shall keep adjoining public streets free and clean of project dirt, mud, materials, and debris during the construction period.

35. Where soil or geologic conditions encountered in grading operations are different from that anticipated in the soil and/or geologic investigation report, or where such conditions warrant changes to the recommendations contained in the original soil investigation, a revised soil or geologic report shall be submitted by the applicant, for approval by the City Engineer. It shall be accompanied by an engineering and geological opinion as to the safety of the site from hazards of land slippage, erosion, settlement, and seismic activity.

36. Prior to placing the initial lift of asphalt and after all aggregate base is placed, all public sewer pipelines and storm drain pipelines shall be video inspected at the expense of the contractor/developer. All videotapes shall be submitted to the City. If any inadequacies are found, they shall be repaired prior to the placement of the final lift of asphalt.

37. No trucks may transport excavated material off-site unless the loads are adequately wetted and either covered with tarps or loaded such that the material does not touch the front, back, or sides of the cargo compartment at any point less than six inches to the top of the cargo compartment. Also, all excavated material must be properly disposed of in accordance with the City’s Standard Specifications.

38. The contractor shall comply with all Occupational Safety & Health Administration (OSHA) requirements.

Milco Development

Conditions of Approval
39. The Grading Permit shall be issued by the Engineering Division.

PRIOR TO CERTIFICATE OF OCCUPANCY:

40. The applicant must apply for and complete annexation of the properties into the Whispering Pines Landscaping and Lighting District.

41. Prior to issuance of a certificate of final occupancy, pursuant to section 17.34.130 of the Development Code, the applicant shall provide the following:

   a. A letter signed by a licensed landscape architect that the landscaping and irrigation have been installed in accordance with the approved plans.

   b. Provide a copy of the landscape maintenance contract, or the bond or cash security guaranteeing the maintenance of the landscaping and irrigation for one year.

PRIOR TO ACCEPTANCE OF PUBLIC IMPROVEMENTS AND EXONERATION OF BONDS, OR OTHER FORM OF SECURITY, THE FOLLOWING CONDITIONS SHALL BE SATISFIED:

42. A Warranty and Guarantee security guaranteeing the public improvements for a period of one year shall be provided in the amount of 10% of the total improvement costs.

43. An acceptable method, such as a tenant agreement and/or CC&R's, must be provided to maintain the common areas, roadways, utilities, detention facilities and the open space. The developer shall provide the appropriate documentation for review by the Community Development Director and City Engineer (and City Attorney if determined necessary by the Community Development Director and/or City Engineer). CC&R's must include a statement that they cannot be modified without the approval of the City of Grass Valley.

44. The Applicant shall sign and record a covenant and agreement to ensure that the onsite storm water facilities will be maintained by the property owner(s).

45. "As-built" plans, signed by the Engineer of Record, must be submitted to the Engineering Division on Mylar and a CD with an AutoCAD (or equivalent) drawing of the public improvements.

46. A final report prepared by the soils engineer, in accordance with the California Building Code, must be submitted to the Engineering Division.

47. A final report prepared by the geologist, in accordance with the California Building Code, must be submitted to the Engineering Division.
48. The grading contractor shall submit a statement of conformance to the as-built plans and specifications.

#### IV. Biological Resources

2. The applicant shall comply with the terms of the nationwide Section 404 permit issued by the U.S. Army Corps of Engineers. This shall include obtaining a Section 401 water quality certification from the Regional Water Quality Control Board and a Section 1602 permit from the Department of Fish and Game. The project shall implement mitigation as approved by the agencies. Such mitigation actions shall include appropriate temporary and permanent BMP's to protect water quality, as well as compensatory mitigation for the loss of habitat by means of payment of in-lieu fees, construction or enhancement of habitat, or a combination of these actions.

### V. CULTURAL RESOURCES

4. If grading or other construction operations unearth archeological or historical artifacts or resources, construction activities shall cease. The Planning Department shall be notified of the extent and location of discovered materials so that they may be recorded by a qualified archaeologist. Disposition of artifacts shall comply with state and federal laws. A note of this requirement shall be clearly delineated on the grading and building plans of the project. If human burial or scattered human remains are inadvertently encountered during construction activities, the applicant shall inform the County Coroner pursuant to state law.

### VI. GEOLOGY AND SOILS

5. Prior to issuance of a grading permit, a detailed engineering plan shall be prepared that incorporates recommendations identified in the Geotechnical Report dated November 8, 2010. Geotechnical measures shall be incorporated into project grading and construction. A Geotechnical Engineer shall review the grading for implementation of those recommendations and design criteria.

### VII. GREENHOUSE GAS EMISSIONS

6. All buildings shall include energy efficient indoor and outdoor lighting and light colored "cool" roofs.
   a. At least 75% of the landscaping within the open space and common areas shall include native and/or drought tolerant landscaping. Shade trees shall be provided at a rate of one for every 25 linear feet of landscaped area.

Agenda Item: 8.2
To: Grass Valley Planning Commission
From: Barb Carman, Planning Technician
Reviewed By: Tom Last, Planning Director
Approved By: Joe C. Heckel, Community Development Director
Application Files: Annexation 10PLN-19, Prezone 10PLN-20, General Plan Amendment Application 10PLN-21, and Development Review Application 10DRC-19
Subject: Milco Development Project - An annexation and prezoning plan of 7.73 acres, and a general plan amendment.

Data Summary
Location: South of Whispering Pines Lane and west of Crown Point Circle next to Whispering Pines Business Park.
Assessor's Parcel No.: 09-680-50, 09-680-53, and 09-680-49
Applicant: Milco Development
Owner: John Miller, Milco Development
Zoning: Current County Zoning BP
General Plan: M-I Manufacturing/Industrial
Environmental Status: Proposed Mitigated Negative Declaration

I. Recommendation: Staff recommends the Planning Commission, by motion, recommend the City Council approve the applications subject to the findings in Section X and the conditions of approval within Attachment 1.

II. Project Description: The site is located along the south of Whispering Pines Lane and west of Crown Point Circle adjacent to the Whispering Pines Business Park. This project consists of the following four applications:

1. An annexation of 7.73 acres into the City of Grass Valley. This includes three (3) parcels 09-680-50, 09-680-53 and 09-680-49 adjacent to Whispering Pines Lane.
2. A General Plan Amendment for modification of the General Plan designation from BP (Business Park) to M-I (Light Industrial). This designation is intended to provide compatibility with the Prezoning and adjoining designations.
3. A prezoning of the properties from the County’s BP zoning to M-I (Light Industrial). This zoning designation would be consistent with the proposed General Plan designation for M-I.
   - Building #1 - 8,186 square feet of warehouse with 604 square feet office.
• Building #2 – 26905 square feet of warehouse with 3,455 square feet office.
• Building #3 – 18,438 square feet of warehouse with 3,158 square feet of office.
• Two of the parcels (09-680-50 and 09-680-53) also require annexation into the Nevada Irrigation Water Service District and will be considered by LAFCo.

The site plan proposes 169 parking spaces located throughout the site. There are two main access points onto the site from Whispering Pines Lane with one located at the northeast corner and the other in the middle of the site. The project will require a large amount of grading and use of retaining walls proposed on the site. On the northwest side, the retaining walls range in height from 1 to 7 feet. One wall along the southwest side is 8 feet in height. The project will require the removal of 29 trees, retaining approximately 86%. A large buffer zone is planned along the southwest side of the site narrowing along the eastern side. The project includes three trash enclosures, a horse-shoe pit, bocce ball court and picnic area.

Drainage from the site is proposed to be collected and directed into two storm drain conduits into stormceptors and then dispersed into drainage along Whispering Pines Lane and along the south side into the natural drainage.

III. Environmental Setting: The 7.73 acres site is located on the south side of Whispering Pines Lane in the County with the eastern property line abutting the City Limits. The parcels are vacant with a mix of black oak, fir and incense cedar trees. The property drains towards the southwest and ranges from 2,608 to 2,650 feet in elevation above sea level. The property is surrounded by light industrial and business park uses.

The topography of the site in general slopes away from a knolltop which is located in the west-central portion of the site. There currently is no development on the property. The site has previously undergone minor modifications which were not for any approved development project. There appears to have previously had a small earthen water reservoir/pond for possible lumber and or mining activity in varied locations. There are dirt roads and trails in and around the site. Aerial photos spanning from 1947 to 2005 indicate that any modifications which had occurred on the site appear to have reverted to resemble the undeveloped status of the late 1940’s. There is an existing intermittent drainage ditch along the eastern side of the property with sparse seasonal riparian habitat. The pond does not appear to have been used during the past 40 years.

The site contains thickets of ponderosa pines mixed with oaks, firs and incense cedars. A small band of Serpentine Foothill Pines (Digger) are located adjacent to Whispering Pines Lane which have been degraded from improvements along the road (Whispering Pines Lane). The project site has non-native grasses throughout.
IV. Environmental Status: The City prepared an Initial Study for the project in accordance with the California Environmental Quality Act (CEQA) Guidelines. The study revealed the project may result in significant impacts on the environment, but mitigation measures have been provided to reduce these impacts to a level that is less than significant. Therefore, a Mitigated Negative Declaration is proposed to be adopted. The Initial Study and proposed Mitigated Negative Declaration were circulated for a 30-day public review period starting on March 2, 2011, and ending on April 1, 2011. The City did receive comments from Northern Sierra Air Quality Management District (NSAQMD) and Nevada Irrigation District (NID) that require modifications and clarifications to the Mitigated Negative Declaration for Air Quality. An addendum was prepared to address these minor revisions.

The environmental document identifies potential impacts on cultural, geology, biological, air quality, greenhouse gas emissions, and hazards and hazardous material resources. The attached Mitigated Negative Declaration discusses each of these issues and provides mitigation measures to reduce the potential impacts to a less than significant level. The mitigation measures are common measures used for similar projects.

The City's traffic policy requires traffic reports for projects that generate more than 50 p.m. peak hour vehicle trips. Based on the Traffic Analysis prepared by TJKM, the project is expected to generate 56 p.m. peak hour trips. This is less than the existing General Plan Land designation of Business Park anticipated, which creates 130 p.m. peak trips. The traffic study also analyzed existing projects and those projects approved but not yet built in the cumulative analysis. All study intersections are projected to operate at the acceptable Level of Service (LOS) "C" or better. The project impacts are not considered significant per the City of Grass Valley standards; however, the project will be required to pay AB 1600 traffic fees.

The geotechnical report noted a potential concern regarding a possible open vertical shaft on the western portion of the property. The site appears to be located over 100 feet from the proposed retaining wall and building site. It will need to be excavated and be mitigated by either over excavation with removal of debris or capped with a concrete plug.

A preliminary biological inventory conducted in 2007 did not show any indications of special-status plant or animal species on the site. The biological report noted a small wetland area which is less than .018 acres. The applicant has obtained a Section 404 permit from the U.S. Army Corps of Engineers. A permit will also be required from the Department of Fish and Game and Regional Water Quality Board.

The addendum discusses briefly how ozone is created and how air quality levels can be affected. There was also a brief discussion regarding construction emissions and emission rates. Clarification was provided for the use of Tier 2 level measures in order to ensure construction emissions will be below the significant threshold.
With the implementation of the mitigation measures, the potential impacts will be reduced to a level that is considered less than significant. Therefore, staff recommends adoption of the proposed Mitigated Negative Declaration.

V. Annexation: This site was designated in the original City's Sphere of Influence for 2000-2005 horizon time. The annexation time horizon represents the time period the City's Sphere of Influence Plan anticipates the land being annexed into the City.

The recently adopted City's Sphere of Influence designates this site as "Near Term", which considers annexation within the next five (5) years. The applicant has requested only the 7.73 acres to be annexed into the City at this time. The applicant has requested that this annexation be prezoned to M-1 to allow light industrial and manufacturing on the site.

The proposed annexation is within the time frame for both the previous and recently adopted Sphere of Influence plans. It is bordered to the north and east by the City limits. In conclusion, staff believes the annexation of this property is logical and appropriate for this area.

NID noted that parcels 09-680-50 and 53 would need to be annexed into NID's water service district in order to be eligible for water service. Parcel 09-680-49 is already within the service district. This annexation would run concurrently with the request for the City.

VI. General Plan Analysis: The Grass Valley 2020 General Plan identifies the site as Business Park. This designation is intended to accommodate a variety of employment generating land uses, including a full range of industrial and commercial uses. The applicant is proposing a General Plan Amendment to modify the General Plan designation from BP (Business Park) to M-I (Light Industrial) to allow light industrial and manufacturing uses. Pages 18 and 19 of the attached Mitigated Negative Declaration lists related General Plan Goals and policies that support the General Plan Amendment and Prezoning to M-1. This designation would be consistent with the adjoining properties to the north and west. The proposed use for industrial warehouse is consistent with the purpose of this designation. In conclusion, staff believes the General Plan Amendment is appropriate for this area.

VII. Zoning and Project Analysis: The proposed prezoning to M-1 (Light Industrial) would be consistent with the adjoining properties and with the proposed General Plan Amendment to M-I (Light Industrial).

The project proposes development and design standards that are consistent with the Development Code for the M-1 Zoning. These include building and parking setbacks which are 20 feet from the back of the curb for major streets. The maximum height allowed by the Development Code is 50 feet or 4 stories. The interior side yard building setback of 10 feet.
The proposed buildings are setback 30 feet or further from the curb, and more than 10 feet from the side and rear property lines. The closest parking stall is approximately 30 feet from the back of the curb. The proposed buildings are 24 feet in height above the existing grade, which meets the height standard. The project requires 136 parking spaces for warehouse/office use. The plans show 169 parking stalls including 10 handicapped spaces provided on site. Required parking is based on the square footage proposed for warehouse and office use. The additional parking on site will allow flexibility for a range of uses in the future allowed within the M-1 zoning designation. At this time the final mix of internal uses has not been determined.

VIII. Development Review / Community Design Guidelines: The project was conceptually reviewed by the Development Review Committee (DRC) in 2008 at which time recommendations were provided to the applicant. Revised plans were submitted for formal review by the DRC addressing the previous recommendations. The project was formally reviewed by the DRC on April 26, 2011 with only minor modifications required.

The overall design of the project includes additional details with raised towers, color bands and additional landscaping. The colors incorporate earth tones which are required in the adjoining Whispering Pines Specific Plan and provide continuity to that area. Large boulder outcroppings with shrubs and trees are proposed along Whispering Pines Lane. Landscape planters are proposed within the site between parking spaces and the edges of the buildings. As noted in the previous section, the applicant proposes to retain a large number of existing trees. There are three trash enclosures located throughout the site. An open space area has been designated between buildings #2 and #3 and includes a bocce ball court, horseshoe pit and picnic area.

The roll up doors for building #1 and #2 are directed to face onto the site instead of toward Whispering Pines Lane. They may be partially visible from the street. However, the landscaping proposed along the frontage includes conifer trees and large shrubs which are intended to provide additional screening of the loading areas.

The DRC reviewed the proposed parking lot lighting fixtures and after consideration determined them to be allowed to remain at 20 feet high. The DRC considered the photometric plan which indicates that the lighting would meet the City’s standards and would not cause excessive light to flow onto adjacent parcels since the lights would be shielded downward. There are no residential uses adjacent to the project. The DRC supported the proposed 8 feet tall retaining wall along the southwest side with additional screening to be provided in the form of shrubs and vines to break up the massing. The DRC also requested the landscape circle in the middle of the entry area be removed and the “green area” between buildings #2 and #3 be enlarged. The 3 foot high retaining wall along the northwest portion will need to have a “cap” added along the top to resemble the sign.
The applicant has submitted revised plans showing the green area enlarged and landscape circle removed. The cap has also been added to the northwest retaining wall.

The applicant has proposed a monument sign at the west entrance with the same color scheme as the buildings. Lighting for the sign will need to be external illumination only.

The buildings incorporate exterior materials, colors and general design of other buildings in the Whispering Pines Business Park. Furthermore, the project includes a substantial landscape buffer between buildings 1 and 3 and Whispering Pines Lane. The project, as proposed, meets the overall intent of the Design Guidelines for industrial complexes.

**IX. Recommendation:** Staff recommends the Planning Commission, by motion, recommend the City Council adopt the Mitigated Negative Declaration and approve Annexation 10PLN-19, Prezone 10PLN-20, General Plan Amendment 10PLN-21, and Development Review Application 10DRC-19, subject to following findings and attached conditions of approval.

**X. Findings:**

1. The City received the application packet for the Milco Project on July 21, 2010. After the City determined the applications were incomplete, the City received additional information and the project was deemed complete on December 28, 2010.

2. The City completed the Initial Study in compliance with the California Environmental Quality Act and concluded that the project may have potentially significant impacts on the environment. Mitigation measures were incorporated into the project to fully mitigate all potentially significant impacts on the environment. The City circulated the proposed Mitigated Negative Declaration for public review (from March 2, 2011 to April 1, 2011) and received comments from the Northern Sierra Air Quality Management District and Nevada Irrigation District.

3. Since the conclusion of the public review period for the proposed Negative Declaration, the City prepared an Addendum to clarify and make insignificant modifications and determined the changes will not lead to any new potential impacts to the environment.

4. The Planning Commission has independently reviewed, analyzed and considered the proposed Mitigated Negative Declaration prior to making its recommendation on this project, and the Mitigated Negative Declaration reflects the independent judgment of the City of Grass Valley.

7. The proposed amendment to the City's General Plan is consistent with the surrounding land uses.

8. The project will require Annexation into the City of Grass Valley and Nevada Irrigation District Water Service Area.

9. The proposed Zoning designation of M-1 will be consistent with the adjoining properties within the Whispering Pines area.

10. The project, as conditioned, is consistent with the applicable sections and development standards in the Grass Valley Development Code.

11. The project complies with the general principles listed in the Community Design Guidelines and the goals and policies in the Community Design Element.

12. That the site is physically suitable for the type of development.

13. The project can be adequately and reasonably served by public facilities, services and utilities.

14. The location, size, planning concepts, design features, and operating characteristics of the project are and will be compatible with the character of the site and the land uses and development intended for the surrounding area by the General Plan.

15. The establishment, maintenance, or operation of the use would not, under the circumstances be detrimental to the health, safety, or general welfare of persons residing or working in the neighborhood of the proposed use, or detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the City.

**XI. Conditions of Approval:**

*Within Attachment Number 1*

**Attachments:**

1. Conditions of Approval
2. Location Map, Site (AP) Map, and General Land Use Map
3. Plans with revised landscaping and site changes
4. Proposed Mitigated Negative Declaration and Addendum

cc: Applicant
Nevada County Planning Department - email
Nevada County Local Agency Formation Commission - email
Nevada Irrigation District
Nevada County Consolidated Fire District

Application 10PLN-19, 20, 21 & 10DRC-19
Grass Valley Planning Commission
Meeting of May 17, 2011
ATTACHMENT #1

1. All plans shall be implemented in accordance with the plans approved by the Grass Valley Planning Commission for Development Review Application 10DRC-19, Annexation 10PLN-19, Prezone 10PLN-20, and General Plan Amendment 10PLN-21 unless changes are approved by the Commission prior to commencing such changes. Minor changes may be approved by the Community Development Department as determined appropriate by the Community Development Director.

2. The applicant agrees to defend, indemnify, and hold harmless the City in any action or proceeding brought against the City to void or annul this discretionary land use approval.

3. The applicant shall file a Notice of Determination, including payment of associated fees, in the office of the County Clerk within (5) days after the approval date of the project. The applicant shall provide a copy of the notice to the City.

4. If construction of the project has not commenced within one (1) year from the date of approval, or by April 26, 2012, the Development Review application approval shall become null and void. For the purposes of this condition, the term "commencement" means the obtaining of a City Building Permit and the initiation of construction activity on the site.

5. As part of the annexation application submitted to the Local Agency Formation Commission, the applicant shall apply to Nevada Irrigation District for Annexation into the water service area for parcels 09-680-50 & 53.

PRIOR TO ISSUANCE OF A GRADING PERMIT, THE FOLLOWING CONDITIONS SHALL BE SATISFIED:

6. The applicant shall submit to the City Engineer for review and approval, an improvements and grading plan prepared by a Registered Civil Engineer; shall obtain a Grading Permit; and shall pay all appropriate fees for plan check and inspection. The grading and improvement plans shall include but not be limited to roadway/driveway/parking lot slopes and elevations, curb, gutters, sidewalks, striping and signing, paving, water and sewer pipelines, storm drains, street/parking lot lights, accessible access from the sidewalk to the buildings and from the accessible parking spaces to the buildings, retaining walls, and all easements, in accordance with City Improvement Standards.

7. The project developer shall adhere to the following tree protection measure as noted on the plans during any construction activities for this project:
All trees to be saved shall be enclosed by a construction barrier placed around the dripline zone of the tree. The construction barrier shall consist of four-foot tall mesh safety fencing in a bright color. The fencing shall be tied to six-foot tall metal poles spaced a maximum of twenty feet apart. Each pole shall be placed with two feet below the surface of the ground.

8. The applicant shall:
   i) Obtain the applicable harvest document(s) from the California Department of Forestry and Fire Protection and submit a copy of the approved document to the City. Either:
      a. Less Than 3 Acre Conversion Exemption. Any project with less than 3 acres of land disturbance may qualify (see 14 CCR 1104.1 (a)(2) for conditions).
      b. Timberland Conversion (PRC4621) and Timber Harvest Plan (PRC.4581). Any project with 3 acres or greater or that do not meet the conditions in 14 CCR 1104.1 (a)(2).
   ii) Obtain a tree removal permit from the Grass Valley Public Works Department.

9. The applicant shall submit to the City Engineer for review and approval two copies of a detailed Soils Engineering Report and Engineering Geology Report certified by a Civil Engineer registered in the State of California. In addition to the California Building Code requirements, the report shall specify the pavement structural sections for the proposed roadways in relation to the proposed traffic indexes. The improvements and grading plans shall incorporate the recommendations of the approved Soils Engineering Report and Engineering Geology Report. The project developer shall retain a civil engineer, soils engineer, and engineering geologist to provide professional inspection of the grading operations. If work is observed as not being in compliance with the California Building Code and the approved improvements and grading plans, the discrepancies shall be reported immediately in writing to the permittee, the building official, and the Engineering Division.

10. The applicant shall prepare a detailed engineering plan that incorporates recommendations identified in the Preliminary Geotechnical Report dated November 8, 2010. Geotechnical measures shall be incorporated into project grading and construction. A Geotechnical Engineer shall be retained for observation during grading operations to ensure implementation of those recommendations included within the Geotechnical Report. (MM5)

11. If any retaining walls or other wall structures equal to or greater than four feet in height (from the base of the footing to the top of the wall) are identified on the grading/improvement plans, the applicant shall:
    a. Place a note on the grading/improvement plans stating that any walls equal to or greater than four feet in height will require a Building Permit prior to being constructed.
b. Submit design calculations for the walls for review and acceptance.

c. If the proposed walls are to be constructed against a cut slope that cannot be graded back per the California Building Code, submit:

1. A signed and stamped letter from a Licensed Civil Engineer or Geotechnical Engineer identifying a temporary shoring plan and how the cut slopes for the walls will be protected from the weather during construction.

2. A signed and stamped letter from a Licensed Civil Engineer or Geotechnical Engineer stating that a copy of the required OSHA Permit will be supplied to the City prior to any excavation on the site and that a qualified OSHA Approved Inspector or Professional Civil Engineer will:
   1) Be onsite during excavation for and construction of the retaining walls;
   2) Be onsite at least once a day during inclement weather; and
   3) Will submit daily reports to the City.

12. The applicant shall submit a Storm Water Pollution Prevention Plan (SWPPP) to the City for acceptance, file a Notice of Intent with the California Water Quality Control Board and comply with all provisions of the Clean Water Act. The applicant shall submit the Waste Discharge Identification (WDID) number, issued by the state, to the Engineering Division.

13. The applicant shall submit to the City Engineer for review and approval, drainage plans, hydrologic, and hydraulic calculations prepared by a Registered Civil Engineer. The drainage plans and calculations shall indicate the following conditions before and after development:

   Quantities of water, water flow rates, major watercourses, drainage areas and patterns, diversions, collection systems, flood hazard areas, sumps and drainage courses. Hydrology shall be in accordance with the City of Grass Valley Improvement Standards and Specifications and Master Plan Drainage Standards.

   In order to preclude significant impact to downstream properties, the applicant shall limit the storm water run-off after development to the pre-development conditions for the 10, 25, and 100 year storm events. The site drainage system shall incorporate water/oil separators, or other approved methods to prevent site contaminants from impacting downstream watersheds.

14. A detailed grading, permanent erosion control and landscaping plan shall be submitted for review and approval by the Engineering Division prior to commencing grading. Erosion control measures shall be implemented in accordance with the approved plans. Any expenses made by the City to enforce the required erosion control measures will be paid by the deposit.
15. The applicant shall submit a Dust Mitigation Plan for review and approval by the Northern Sierra Air Quality Management District and City Engineer. Dust mitigation measures shall be implemented in accordance with the approved Dust Mitigation Plan. The dust mitigation plan shall include the following:

a. The applicant shall be responsible for ensuring that all adequate dust control measures are implemented in a timely manner during all phases of project development and construction.
b. All material excavated, stockpiled, or graded shall be sufficiently watered, treated, or covered to prevent dust from leaving the property boundaries and causing a public nuisance or a violation of an ambient air standard. Watering should occur at least twice daily, with complete site coverage.
c. All land clearing, grading, earth moving, or excavation activities on the project shall be suspended as necessary to prevent excessive windblown dust when winds are expected to exceed 20 mph.
d. All inactive portions of the development site shall be covered, seeded, or watered until a suitable cover is established. Alternatively, the applicant shall be responsible for applying City approved non-toxic soil stabilizers (according to manufactures specifications) to all inactive construction areas (previously graded areas which remain inactive for 96 hours) in accordance with the local grading ordinance.
e. All areas with vehicle traffic shall be watered or have dust palliative applied as necessary for regular stabilization of dust emissions.
f. All material transported off-site shall be either sufficiently watered or securely covered to prevent public nuisance.
g. Paved streets adjacent to the project shall be swept at the end of each day, or as required to remove excessive accumulations of silt and/or mud which may have resulted from activities at the project site.
h. No burning of waste material or vegetation shall take place on-site unless deemed infeasible by the District. Alternatives to burning include chipping, mulching or converting to biomass. (MM1)

16. The applicant shall submit sewer calculations for the proposed development and any calculations necessary to verify the existing sewer system’s ability to carry the additional flow created by the development.

17. The applicant shall provide information that Waste Management of Grass Valley (WMGV) has approved the plan for the trash/recycling container. The trash/recycling container shall be of adequate size to accommodate the trash and recycling needs of proposed use. The plan shall also be designed for adequate access and servicing by WMGV. The applicant shall provide verification to the Community Services Department that the trash/recycling container has been approved by WMGV. The trash/recycling container shall be installed in accordance with the approved plan prior to occupancy of the building.

18. The improvements and grading plans shall be signed by all other jurisdictional agencies involved (i.e. NID), prior to receiving City Engineer approval.
19. Per the Development Code, the Grading Permit shall expire one (1) year from the effective date of the permit unless an extension is granted by the City Engineer (for up to 180 days).

20. The applicant shall submit final landscape and irrigation plans, prepared by a licensed landscape architect, for review and approval by the Planning and Engineering Divisions. Landscaping design shall comply with all provisions of the City's Water Efficient Landscape Ordinance. The landscape plan shall include evidence that the project provides 20% coverage of the site with landscaping and 50% shade coverage of the parking areas. The plans shall also indicate plantings of vines and shrubs for the retaining wall on the southwest side.

21. The applicant must apply for and complete a parcel merger for APN's 09-680-49, 50 and 53. The parcel merger must be recorded prior to acceptance of the improvements.

PRIOR TO INITIATING GRADING AND/OR CONSTRUCTION OF THE SITE IMPROVEMENTS FOR THE PROJECT, THE DEVELOPER SHALL INITIATE THE FOLLOWING:

22. That prior to any work being conducted within the State, County or City right-of-way, the applicant shall obtain an Encroachment Permit from the appropriate Agency.

23. A minimum of forty-eight (48) hours prior to commencement of grading activities, the developer's contractor shall notify both the Planning and Engineering Divisions of the intent to begin grading operations. Prior to notification, all grade stakes shall be in place identifying limits of all cut and fill activities. After notification, Planning and Engineering staff shall be provided the opportunity to field review the grading limits to ensure conformity with the approved improvement and grading plans. If differences are noted in the field, grading activities shall be delayed until the issues are resolved.

24. Placement of construction fencing around all trees designated to be preserved in the project.

25. Submittal of two copies to the Engineering Division of the signed improvement/grading plans.

26. Pre-construction surveys for nesting raptors should be conducted prior to construction activities between March 1 and September 30. Surveys should be completed no later than 7 days prior to commencement of grading activity. If a legally-protected species nest is located in a tree designated for removal, removal shall be delayed until after September 30th or until the adults and young are no longer dependent on the nest which will need to be determined by a
biologist. If no raptor nests are detected, construction activities may proceed with no further mitigation. *(MM3)*

**PRIOR TO ISSUANCE OF BUILDING PERMIT(S):**

27. Submit for review and approval by the Fire Department, a Fire Safety Plan.

28. Prior to the issuance of building permits, the following items shall be approved and/or verified by the Fire Department:

   a. Required fire flow for these buildings could not be determined. Provide type of construction for the buildings. After fire flow has been determined, the local water agency (NID) shall submit letter stating the ability to meet require fire flow.

   b. Depending on construction type and fire flow, a Fire Sprinkler System may be required for Building #1. Sprinklers will be required in buildings #2 and #3 to meet NFPA standards. Separate submittals will be required to the Fire Department.

   c. A Fire Alarm System for the monitoring of the Fire Suppression System shall be required for buildings #2 and #3 and may be required in building #1. All plans and works shall be subject to the California State Contractors License Law and requirements.

   d. The number of fire hydrants for this project shall be determined once fire flow for the structures has been calculated.

   e. Fire apparatus access roads shall have unobstructed width of not less than 20 feet and unobstructed vertical clearance of not less than 13 feet 6 inches.

   f. Approved address numbers are to be placed on the building(s) in such a position as to be clearly visible and legible from the street providing access to the building. Address numbers shall sharply contrast with their background and shall comply with the following minimum height and width dimensions based on the location of the address numbers in relation to the street providing access to the building:

<table>
<thead>
<tr>
<th>Distance</th>
<th>Height</th>
<th>Width</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-20 feet</td>
<td>4 inches</td>
<td>3/4-inch</td>
</tr>
<tr>
<td>21-35 feet</td>
<td>6 inches</td>
<td>1-inch</td>
</tr>
<tr>
<td>36-49 feet</td>
<td>9 inches</td>
<td>1-1/4 inches</td>
</tr>
<tr>
<td>50 feet or more</td>
<td>12 inches</td>
<td>1-1/2 inches</td>
</tr>
</tbody>
</table>

   g. Fire flow calculations shall be submitted to this department, along with the civil plan submittals.

   h. Dead-end fire apparatus access roads in excess of 150 feet shall be provided with an approved area for turning around the fire apparatus. A dead-end roadway is shown adjacent to building #2. An approved turn around shall be provided for the fire apparatus.
29. All buildings shall include energy efficient indoor and outdoor lighting and light colored "cool" roofs.
   a. At least 75% of the landscaping within the open space and common areas shall include native and/or drought tolerant landscaping. Shade trees shall be provided at a rate of one for every 25 linear feet of landscaped area.
   b. Size & orientation of windows & doors shall be designed to take advantage of sun, shade & wind conditions to minimize the requirement on mechanical heating and cooling systems. Site buildings to take advantage of solar orientation. Proper building orientation facilitates the use of natural daylight.
   c. Incorporate Natural Cooling by utilizing shading from tree canopies (for east & west facing glass). Any combination of natural cooling techniques can be used to reduce overheating, reduce the need for air conditioning and reduce energy.
   d. All windows shall be Energy Star rated.
   e. Upgrade insulation to exceed California Title 24 requirements (MM6)

30. The following items shall be submitted as part of the Building Permit Application package and be subject to the review and approval of the Planning Department:
   a. Building and appurtenant structure exterior colors and materials. Paint chips of the proposed color scheme shall be included.
   b. Utility meter, transformer, irrigation control unit location and screening.

   All of the aforementioned plans shall incorporate all of the design specifications and criteria as shown on the site plan approved and modified by the City Council on ____________, unless otherwise modified as specified by condition # 1.

DURING CONSTRUCTION, THE FOLLOWING CONDITIONS SHALL APPLY:

31. If grading or other construction operations unearth archeological or historical Artifacts or resources, construction activities shall cease. The Planning Division shall be notified of the extent and location of discovered materials so that they may be recorded by a qualified archaeologist. Disposition of artifacts shall comply with state and federal laws. A note of this requirement shall be clearly delineated on the grading and building plans of the project. (MM4)

32. If any hazardous waste is encountered during the construction of this project, all work shall be immediately stopped and the Nevada County Environmental Health Department, the Fire Department, the Police Department, and the City Inspector shall be notified immediately. Work shall not proceed until clearance has been issued by all of these agencies.
33. The applicant shall comply with the terms of the nationwide Section 404 permit issued by the U.S. Army Corps of Engineers. This shall include obtaining a Section 401 water quality certification from the Regional Water Quality Control Board and a Section 1602 permit from the Department of Fish and Game. The project shall implement mitigation as approved by the agencies. Such mitigation actions shall include appropriate temporary and permanent BMP's to protect water quality, as well as compensatory mitigation for the loss of habitat by means of payment of in-lieu fees, construction or enhancement of habitat, or a combination of these actions. (MM2)

34. Prior to final preparation of the subgrade and placement of pavement base materials, all underground utilities shall be installed and service connections stubbed out behind the hardscape improvement. Public utilities, Cable TV, sanitary sewers, and water lines, shall be installed in a manner which will not disturb the street pavement, curb, gutter and sidewalk, when future service connections or extensions are made.

35. The developer shall keep adjoining public streets free and clean of project dirt, mud, materials, and debris during the construction period.

36. Where soil or geologic conditions encountered in grading operations are different from that anticipated in the soil and/or geologic investigation report, or where such conditions warrant changes to the recommendations contained in the original soil investigation, a revised soil or geologic report shall be submitted by the applicant, for approval by the City Engineer. It shall be accompanied by an engineering and geological opinion as to the safety of the site from hazards of land slippage, erosion, settlement, and seismic activity.

37. Prior to placing the initial lift of asphalt and after all aggregate base is placed, all public sewer pipelines and storm drain pipelines shall be video inspected at the expense of the contractor/developer. All videotapes shall be submitted to the City. If any inadequacies are found, they shall be repaired prior to the placement of the final lift of asphalt.

38. No trucks may transport excavated material off-site unless the loads are adequately wetted and either covered with tarps or loaded such that the material does not touch the front, back, or sides of the cargo compartment at any point less than six inches to the top of the cargo compartment. Also, all excavated material must be properly disposed of in accordance with the City's Standard Specifications.

39. The contractor shall comply with all Occupational Safety & Health Administration (OSHA) requirements.

40. The Grading Permit shall be issued by the Engineering Division.
PRIOR TO CERTIFICATE OF OCCUPANCY:
41. The applicant must apply for and complete annexation of the properties into the Whispering Pines Landscaping and Lighting District.

42. Prior to issuance of a certificate of final occupancy, pursuant to section 17.34.130 of the Development Code, the applicant shall provide the following:
   a. A letter signed by a licensed landscape architect that the landscaping and irrigation have been installed in accordance with the approved plans.
   b. Provide a copy of the landscape maintenance contract, or the bond or cash security guaranteeing the maintenance of the landscaping and irrigation for one year.

PRIOR TO ACCEPTANCE OF PUBLIC IMPROVEMENTS AND EXONERATION OF BONDS, OR OTHER FORM OF SECURITY, THE FOLLOWING CONDITIONS SHALL BE SATISFIED:

43. A Warranty and Guarantee security guaranteeing the public improvements for a period of one year shall be provided in the amount of 10% of the total improvement costs.

44. An acceptable method, such as a tenant agreement and/or CC&R's, must be provided to maintain the common areas, roadways, utilities, detention facilities and the open space. The developer shall provide the appropriate documentation for review by the Community Development Director and City Engineer (and City Attorney if determined necessary by the Community Development Director and/or City Engineer). CC&R’s must include a statement that they cannot be modified without the approval of the City of Grass Valley.

45. The Applicant shall sign and record a covenant and agreement to ensure that the onsite storm water facilities will be maintained by the property owner(s).

46. "As-built" plans, signed by the Engineer of Record, must be submitted to the Engineering Division on Mylar and a CD with an AutoCAD (or equivalent) drawing of the public improvements.

47. A final report prepared by the soils engineer, in accordance with the California Building Code, must be submitted to the Engineering Division.

48. A final report prepared by the geologist, in accordance with the California Building Code, must be submitted to the Engineering Division.

49. The grading contractor shall submit a statement of conformance to the as-built plans and specifications.
Development Review Application (10DRC-19), Annexation Application (10PLN-19), Prezoning Application (10PLN-20), and General Plan Amendment (10PLN-21) for Milco Development for the Annexation of 7.73 acres into the City; Prezoning the land to M-1; and a General Plan Amendment to Manufacturing/Industrial for the development of three commercial buildings totaling 57,315 sq. ft. on 7.73 acres located in Nevada County at 11107 Whispering Pines Lane (APNs 09-680-49, 50 and 53).

Initial Study and Proposed Negative Declaration

Prepared by
City of Grass Valley
125 East Main Street
Grass Valley, CA 95949

February 28, 2011
Proposed
Mitigated Negative Declaration

In accordance with the California Environmental Quality Act, the City of Grass Valley has conducted an Initial Study to determine whether the following project may have a significant adverse effect on the environment. On the basis of that study, the City finds that the proposed project will not have a significant adverse effect on the environment and will not require the preparation of an Environmental Impact Report. Therefore, this Negative Declaration has been prepared.

LEAD AGENCY: City of Grass Valley
125 East Main Street
Grass Valley, CA. 95945

Contact: Thomas Last, Planning Director
(530) 274-4711

PROJECT APPLICANT: John Miller
Milco Development Inc.
13620 Lincoln Way, Ste 300
Auburn, CA 95603

Contact: John Miller

PROJECT LOCATION: The 7.73 acre project is located south of Whispering Pines Lane and west of Crown Point Circle next to the Whispering Pines Business Park (APN's 09-680-50, 09-680-53 and 09-680-49). The property is currently located within the County boundaries, with the eastern property line abutting the City limits.

PROJECT DESCRIPTION: The project consists of the following four applications:

1. An annexation of the entire 7.73 acres into the City of Grass Valley which is within the Sphere of Influence for the 2000-2005 time horizon. Also includes annexing 7.52 acres into the Nevada Irrigation Water District (APN's 09-680-50 and 53)
2. A prezoning of the site to M-1 (Light Industrial/Manufacturing) to allow the type of proposed development consistent with the adjacent parcels.
3. A general plan amendment to change the proposed general plan from BP (Business Park) to M-I (Light Industrial/Manufacturing) in order to be consistent with the surrounding parcels and zoning designation.
4. Development Review for the construction of three, single-story light industrial buildings on the site. The buildings total 57,315 square feet and the project includes 169 parking spaces, a bocce ball court, horseshoe pit area and picnic area. Landscaping includes the use of boulders and shrubs throughout the site and shade trees located in the parking lot and around the buildings.

REVIEW PERIOD: (30 days) March 2, 2011 through April 1, 2011

Annexation (10PLN-19), General Plan Amendment (10PLN-21), Prezone (10PLN-20) and Development Review (10DRC-19)

Initial Study & Negative Declaration
1. **Application Number:** Annexation 10PLN-19, Prezone 10PLN-20, General Plan Amendment 10PLN-21 and Development Review Application 10DRC-19.

2. **Applicant's/Representative's Name and Address:**
   - **John Miller**
   - Milco Development
   - 13620 Lincoln Way, Ste 300
   - Auburn, CA 95603

3. **Lead Agency Name and Address:**
   - City of Grass Valley, Community Development Department
   - 125 East Main Street
   - Grass Valley, CA 95949

4. **Project Description:**
   - The project consists of the following four applications:
     1. An annexation of 7.73 acres currently within the County's jurisdiction. This site was designated in the Sphere of Influence for 2000-2005 horizon for annexation. Also includes annexation of 7.2 acres into the Nevada Irrigation Water District (APN's 09-680-50 &53).
     2. A pre-zoning of the land from the County's BP zoning district to the City's M-1 (Light Industrial) zoning district. This zoning would be consistent with the zoning of the adjacent properties.
     3. A general plan amendment to modify the 2020 General Plan from BP to M-I to allow light industrial and manufacturing consistent with adjoining properties.
     4. Development Review for the construction of three, single-story light industrial buildings on the site. The buildings total 57,315 square feet and include 169 parking spaces, a bocce ball court, horseshoe pit area and picnic area. The project also includes landscaping and shading in the parking lot and around the buildings.

5. **Project Location:** The 7.73 acres site is located along the south side of Whispering Pines Lane, west of the intersection with Clydesdale Court.

6. **General Plan Designation:** M-I

7. **Zoning:** M-1

8. **Other public agencies whose approval is required (e.g. permits, financing approval, or participation agreement):**
   - Northern Sierra Air Quality Management District
   - United States Army Corps of Engineers
   - Regional Water Quality Control Board
   - California Department of Fish and Game
   - Nevada Irrigation District
DETERMINATION
On the basis of this initial evaluation:

   ___ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

   X__ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

   ___ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

   ___ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated impact" on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

   ___ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to the earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Signature __________________________ Date __________________________

Printed Name ________________________ For __________________________

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:
The environmental factors checked below would be significantly affected by this project as indicated by the checklist in the following sections:

☐ Aesthetics  ☑ Air Quality  ☐ Agriculture and Forest Resources
☐ Biological Resources  ☑ Cultural Resources  ☐ X Geology / Soils
☒ Greenhouse Gas Emissions  ☑ Hazards and Hazardous Materials
☐ Hydrology/Water Resources  ☐ Land Use/Planning  ☐ Mineral Resources
☐ Noise  ☐ Population/Housing  ☐ Public Services
☐ Recreation  ☐ Transportation/Traffic  ☐ Utilities/Service Systems

Annexation (10PLN-19), General Plan Amendment (10PLN-21), Prezone (10PLN-20) and Development Review (10DRC-19)

Initial Study & Negative Declaration 4
Mandatory Findings of Significance

CEQA GUIDANCE

Appendix I of the State CEQA Guidelines was used in answering the checklist questions:

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the discussion. A "No Impact" answer is adequately supported if the discussion shows that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained when it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2. All answers must take account of the whole action involved, including offsite as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4. "Negative Declaration: Less than Significant with Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less-than-significant level (mitigation measures from earlier analyses may be cross-referenced).

5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration (State CEQA Guidelines Section 15063[c][D]). In this case, a brief discussion should identify the following:
   a. Earlier Analysis Used. Identify and state where they are available for review.
   b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
   c. Mitigation Measures. For effects that are “Less than Significant with Mitigation Measures Incorporated,” describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., General Plans, Land Use Codes). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8. This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project’s environmental effects in whatever format is selected.

9. The explanation of each issue should identify:
   a. the significance criteria or threshold, if any, used to evaluate each question; and
   b. the mitigation measure identified, if any, to reduce the impact to less than significance

Identification of the potential for residual significant adverse environmental impacts would trigger the need for preparation of an Annexation (10PLN-19), General Plan Amendment (10PLN-21), Prezone (10PLN-20) and Development Review (10DRC-19)
For issue areas in which no significant adverse impact would result or impacts would be reduced to a less-than-significant level by mitigation, further analysis is not required.
### Discussion of Checklist Answers:

The City of Grass Valley's General Plan includes objectives for the protection of major views in the planning area, including hillsides, ridgelines and forested areas. The General Plan's Conservation/Open Space Element includes a discussion about the 1972 and 1982 General Plans establishing Highway 49/20 as a scenic highway. The 1972 General Plan proposed policies prohibiting billboards and off-premise signs, and encouraged landscaping and tree planting along scenic corridors. The 1982 General Plan reinforced those policies and efforts through new policies designed to enhance City "entryways". The plan also identified the need to address viewsheds, specifically, prominent hills and ridgelines. The 2020 General Plan states the City has implemented some aspects of scenic highway/entryway and hillside/ridgeline provisions through the zoning and design guidelines. However, the adopted policies focus on further implementing viewshed protection measures. Caltrans has noted that the Highway 49/20 corridor is on the eligibility list to become a State Scenic Highway. The entire length of Highway 49, from Madera to Sierra Counties, is on the "eligibility list", with only a small section in Sierra County being "officially designated". To become "officially designated" as a State Scenic Highway, each local jurisdiction must conduct a substantial amount of research, adopt a scenic corridor protection program, and comply with the State's process and obtain the State's approval for the designation.

The project site includes of a knolltop in the west central portion of the site. The site slopes away from the knolltop. The site has not previously had development although there are dirt roads and trails and many trees which were removed several years ago. The site is not within the highway 20/49 corridor. There is a Ponderosa Pine forest mixed with black oaks, firs, and incense cedars throughout approximately 5 acres of the site. A narrow band of Digger Pines Woodland is along the north side bordering Whispering Pines Lane. Numerous native species including poison oak, mountain misery and deerbrush are scattered over the site indicating previous disturbances on the site. Portions of the site have previously been graded with dirt roads winding through.

The proposed buildings include a design that is found within the Whispering Pines area. The Development Review Committee and Planning Commission could request some additional architectural treatment (e.g. a wainscot, color changes) on the buildings. Such architectural changes would be considered minor. The landscape plan includes perimeter planting to screen the drive aisle, parking and loading/storage areas. The landscape plan also shows the location of new trees and location of those trees to be retained in close proximity to the developed areas of the site.

The site has previously been modified over the years being used originally for mining and storage of waste rock in the 1940's. A small earthen reservoir was below the property (located to the south) but has not had any activity since that time. The site has been allowed to revert to a more natural state. The proposed development area would require grading to accommodate the 57,315 square feet of commercial development. This will result in the need to remove approximately 29 trees with a diameter of 8" or greater. The applicant estimates roughly 180 trees would be preserved. This represents a preservation rate of approximately 86%, which exceeds the City's goal of 20% tree retention. The plan does provide for protection of trees around the perimeter of the site which will create screening along the western side of the property. Proposed lighting for the site incorporates twenty pole lights, 20 feet high in the parking areas and twenty seven wall light units on the buildings.

<table>

</table>

**1. AESTHETICS**

Would the proposal:

- Have a substantial adverse effect on a scenic vista?
- Substantially damage scenic resources, including, but not limited to, tree, rock outcroppings, and historic buildings within a scenic state highway?
- Substantially degrade the existing visual character or quality of the site and its surroundings?
- Create a new source of substantial light or glare which would adversely affect day or nighttime views in this area?

Discussion of Checklist Answers:

The City of Grass Valley's General Plan includes objectives for the protection of major views in the planning area, including hillsides, ridgelines and forested areas. The General Plan's Conservation/Open Space Element includes a discussion about the 1972 and 1982 General Plans establishing Highway 49/20 as a scenic highway. The 1972 General Plan proposed policies prohibiting billboards and off-premise signs, and encouraged landscaping and tree planting along scenic corridors. The 1982 General Plan reinforced those policies and efforts through new policies designed to enhance City "entryways". The plan also identified the need to address viewsheds, specifically, prominent hills and ridgelines. The 2020 General Plan states the City has implemented some aspects of scenic highway/entryway and hillside/ridgeline provisions through the zoning and design guidelines. However, the adopted policies focus on further implementing viewshed protection measures. Caltrans has noted that the Highway 49/20 corridor is on the eligibility list to become a State Scenic Highway. The entire length of Highway 49, from Madera to Sierra Counties, is on the "eligibility list", with only a small section in Sierra County being "officially designated". To become "officially designated" as a State Scenic Highway, each local jurisdiction must conduct a substantial amount of research, adopt a scenic corridor protection program, and comply with the State's process and obtain the State's approval for the designation.

The project site includes of a knolltop in the west central portion of the site. The site slopes away from the knolltop. The site has not previously had development although there are dirt roads and trails and many trees which were removed several years ago. The site is not within the highway 20/49 corridor. There is a Ponderosa Pine forest mixed with black oaks, firs, and incense cedars throughout approximately 5 acres of the site. A narrow band of Digger Pines Woodland is along the north side bordering Whispering Pines Lane. Numerous native species including poison oak, mountain misery and deerbrush are scattered over the site indicating previous disturbances on the site. Portions of the site have previously been graded with dirt roads winding through.

The proposed buildings include a design that is found within the Whispering Pines area. The Development Review Committee and Planning Commission could request some additional architectural treatment (e.g. a wainscot, color changes) on the buildings. Such architectural changes would be considered minor. The landscape plan includes perimeter planting to screen the drive aisle, parking and loading/storage areas. The landscape plan also shows the location of new trees and location of those trees to be retained in close proximity to the developed areas of the site.

The site has previously been modified over the years being used originally for mining and storage of waste rock in the 1940's. A small earthen reservoir was below the property (located to the south) but has not had any activity since that time. The site has been allowed to revert to a more natural state. The proposed development area would require grading to accommodate the 57,315 square feet of commercial development. This will result in the need to remove approximately 29 trees with a diameter of 8" or greater. The applicant estimates roughly 180 trees would be preserved. This represents a preservation rate of approximately 86%, which exceeds the City's goal of 20% tree retention. The plan does provide for protection of trees around the perimeter of the site which will create screening along the western side of the property. Proposed lighting for the site incorporates twenty pole lights, 20 feet high in the parking areas and twenty seven wall light units on the buildings.
which are designed to be shielded and directed downward. The proposed lighting generated would be less than a three (3) foot candle radius. The City's Development Code standard for lighting in parking lots is a maximum height of 14 feet although the Development Review Committee may allow fixtures to be up to 20 feet high. The Design Guidelines for industrial areas does state that light standards shall not exceed 20 feet. The adjoining property to south and west are currently vacant, and properties to the north and east abutting the City limits are also industrial uses where no light spillage will occur onto the neighboring properties. The levels would be considered within acceptable limits for light generation and distribution.

**Conclusion:**
The property is not designated as a scenic vista, and will not significantly degrade the visual character of the area. Additionally, the property is not within a scenic highway corridor. The proposed lighting plan demonstrates that the project will not have a significant adverse impact on aesthetics if it is developed as proposed.

**Mitigation:**
No significant impacts associated with aesthetics or scenic resources are anticipated within his commercial development. No mitigation measures would be required.

**Discussion of Checklist Answers:**
The overall air quality in Nevada County is good but two known air quality problems exist, the Ozone and Suspended Particulate Matter (PM-10). Nevada County is considered to be "non-attainment" for both pollutants. PM-10 in Grass Valley meets federal ambient standards but exceeds more stringent State standards in the winter, primarily due to smoke created from wood stoves and fireplaces. Violations in the summer months have been noted during forest fires or periods of open burning. The PM-10 is usually associated with dust generated during construction. The project will require excavation work to accommodate the building pads and roadways. Dust generated by grading and construction activities could have a potential to create short-term air quality impacts. The use and operation of the business will not generate pollutants, odors or
impact air movement in the immediate area. Even though this is a relocation and expansion of an existing business, the project is expected to
generate additional vehicular traffic which will increase local vehicle emissions. The project is located within the Northern Sierra Air Quality
Management District (NSAQMD). The NSAQMD has adopted standard regulations and mitigation measures for projects that exceed certain air
quality threshold levels to address and mitigate both long and short-term emissions. The NSAQMD threshold levels are divided into three levels
(A, B, and C). Depending on which of the tiers the project falls within, the NSAQMD applies that level of mitigation. NSAQMD relies on the air
quality program, URBEMIS 2007, version 9.2.4, to estimate criteria pollutants created by a project. Projects that generate 136 tons per day of
Reactive Organic Gases (ROG), Oxides of Nitrogen (NOx), or Particulate Matter (PM10) are considered significant impacts. The URBEMIS
modeling indicates this project will result in total area source operational emissions of 0.38 tons/year ROG, 0.03 tons/year PM10, 0.54 tons/year
for NOx and 0.02 tons/year of PM2.5.

Conclusion:
The modeling concludes this project will generate air emissions below the City threshold and no mitigation is needed. The project will be
required to comply with NSAQMD standard mitigation measures. With the implementation of the mitigation measure, if necessary, the
project would not have a significant impact on the environment associated with health hazards.

Mitigation:
1. Prior to issuance of a grading permit, a Dust Mitigation Plan shall be submitted for review and approval by the Northern Sierra Air Quality
Management District and City Engineer. Dust mitigation measures shall be implemented in accordance with the approved Dust Mitigation Plan.
The dust mitigation plan shall include the following:

- The applicant shall be responsible for ensuring that all adequate dust control measures are implemented in a timely manner
during all phases of project development and construction.
- All material excavated, stockpiled, or graded shall be sufficiently watered, treated, or covered to prevent dust from leaving the
property boundaries and causing a public nuisance or a violation of an ambient air standard. Watering should occur at least
twice daily, with complete site coverage.
- All land clearing, grading, earth moving, or excavation activities on the project shall be suspended as necessary to prevent
excessive windblown dust when winds are expected to exceed 20 mph.
- All inactive portions of the development site shall be covered, seeded, or watered until a suitable cover is established.
Alternatively, the applicant shall be responsible for applying City approved non-toxic soil stabilizers (according to manufactures
specifications) to all inactive construction areas (previously graded areas which remain inactive for 96 hours) in accordance with
the local grading ordinance.
- All areas with vehicle traffic shall be watered or have dust palliative applied as necessary for regular stabilization of dust
emissions.
- All material transported off-site shall be either sufficiently watered or securely covered to prevent public nuisance.
- Paved streets adjacent to the project shall be swept or washed at the end of each day, or as required to remove excessive
accumulations of silt and/or mud which may have resulted from activities at the project site.
- No burning of waste material or vegetation shall take place on-site.
### AGRICULTURE AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

Would the project:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>X</td>
</tr>
</tbody>
</table>

**Discussion of Checklist Answers:**

This property is surrounded primarily by industrial uses. The project location is not considered as farmland or used for agricultural purposes. The property does not contain the Williamson Act contract, nor is it located near any active farms. There will be no loss of forest land or conversion of forest land to non-forest use.

**Conclusion:**

Impacts associated with the agricultural and forest resources are considered less than significant.

**Mitigation:**

No mitigation measures required.

**Discussion of Checklist Answers:**

The property is located on the south side of Whispering Pines Lane near Clydesdale Court. The topography of the site generally slopes away from a knolltop which is located in the west-central portion of the site. There currently is no development on the property. The site has previously undergone minor modifications which were not for any approved development project. There appears to have previously had a small earthen water reservoir/pond for possible lumber and or mining activity in varied locations. There are dirt roads and trails in and around the site. Aerial photos spanning from 1947 to 2005 indicate that any modifications which had occurred on the site appear to have reverted to resemble the undeveloped status of the late 1940's. A preliminary biological inventory conducted in 2007 did not show any indications of special-status plant or animal species on the site. There is an existing intermittent drainage ditch along the eastern side of the property with sparse seasonal riparian habitat. The pond does not appear to have been used during the past 40 years and does not contain wetland or riparian habitats.

The site contains thickets of ponderosa pines mixed with oaks, firs and incense cedars. A small band of Serpentine Foothill Pines (Digger) are located adjacent to Whispering Pines Lane which have been degraded from improvements along the road (Whispering Pines Lane).
project site has non-native grasses throughout.

The biological study indicates an intermittent drainage ditch that has seasonal riparian habitat located along the eastern boundary under existing power lines. The Army Corps of Engineers verified a wetland delineation for the area. The biological study includes mitigation, which will reduce these impacts to a level that is less than significant. The applicant has applied and received a Nationwide 404 permit from the Army Corps of Engineers (NWP39) for the loss of .018 acre of intermittent and .369 acre of riparian wetland. This was presented in a letter from the Army Corps of Engineers dated May 13, 2010. A 401 permit from the Regional Water Quality Control Board and a 1602 permit from the California Department of Fish and Game will also be required.

The study also notes that there are a variety of larger trees on site that create a canopy cover and could potentially support nesting raptors. Since a number of trees will be removed for the project, there is a potential the project could impact nesting raptors. Therefore, a mitigation measure is included to reduce any impacts on these birds. The site does not contain, nor is it near, any adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

Conclusion:
With the incorporation of the following mitigation measures, impacts associated with biological resources are considered less than significant.

Mitigation:
2. The applicant shall comply with the terms of the nationwide Section 404 permit issued by the U.S. Army Corps of Engineers. This shall include obtaining a Section 401 water quality certification from the Regional Water Quality Control Board and a Section 1602 permit from the Department of Fish and Game. The project shall implement mitigation as approved by the agencies. Such mitigation actions shall include appropriate temporary and permanent BMP’s to protect water quality, as well as compensatory mitigation for the loss of habitat by means of payment of in-lieu fees, construction or enhancement of habitat, or a combination of these actions.

3. Pre-construction surveys for nesting raptors should be conducted prior to construction activities between March 1 and September 30. Surveys should be completed no later than 7 days prior to commencement of grading activity. If a legally-protected species nest is located in a tree designated for removal, removal shall be delayed until after September 30th or until the adults and young are no longer dependent on the nest which will need to be determined by a biologist. If no raptor nests are detected, construction activities may proceed with no further mitigation.

Discussion of Checklist Answers:
The site is currently vacant and surrounded by other business park or vacant land. The General Plan identifies this property as having
Moderate cultural sensitivity. This area is classified as moderate due to past mining activities that have occurred in the vicinity of the property. There are no visible signs of historical resources in the development area. The CEQA guidelines require, as part of the objectives, criteria and procedures required by section 21082 of Public Resources Code, a lead agency should make provisions if historical or unique archaeological resources accidentally discovered during construction. A mitigation measure is proposed to address this should cultural resources be discovered during construction consistent with the cultural and historic element of the General Plan.

Conclusion
With the incorporation of the following mitigation measure, impacts associated with cultural resources are considered less than significant.

Mitigation:

4. If grading or other construction operations unearth archeological or historical artifacts or resources, construction activities shall cease. The Planning Department shall be notified of the extent and location of discovered materials so that they may be recorded by a qualified archaeologist. Disposition of artifacts shall comply with state and federal laws. A note of this requirement shall be clearly delineated on the grading and building plans of the project.

</tbody>
</table>

**Discussion of Checklist Answers:**
The Soil Survey of Nevada County identifies the soils on the western and central site as "Sites very stony loam" and on the eastern portion "Alluvial Land, Clayey, soil type". The Stony Loam is a well-drained soil which has a medium runoff potential and the erosion hazard is slight to moderate. The Alluvial Land, Clayey is reported to be moderately to poorly drained soils. This soil is generally considered a stable soil, with moderate landslide potential. There are no identified active fault lines on the property. The project will require a substantial amount of grading to accommodate the project. The preliminary grading plan shows the use of retaining walls which range in heights between 1 and 8 feet along the southwest and between 3 and 4 feet on the eastern portion of the site. The current standard for retaining walls in the City is 6 feet. This will be addressed by the Development Review Committee and the City Engineering Department since it is not visible from the public view. The southeast corner of the site has a 2:1 fill proposed. The City of Grass Valley is located in the low intensity zone for earthquake severity. A Geotechnical Report dated November 8, 2010 was submitted with the application. The geotechnical report concludes that the site is suitable for the proposed project. There are standard conditions in the report which the applicant will need to comply with. The project will be required to comply with the City's erosion control standards and Storm Water Management program during construction.

**Conclusion:**
With the incorporation of the following mitigation measure, impacts associated with geology and geologic hazards are considered less than significant.

**Mitigation:**
5. Prior to issuance of a grading permit, a detailed engineering plan shall be prepared that incorporates recommendations identified in the Geotechnical Report dated November 8, 2010. Geotechnical measures shall be incorporated into project grading and construction. A Geotechnical Engineer shall review the grading for implementation of those recommendations and design criteria.

</tr>
<tr>
<td>b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

**Discussion of Checklist Answers:**
Greenhouse gases (GHG) include gases that can affect the earth's surface temperature. The natural process through which heat is retained in the troposphere is called the greenhouse effect. The greenhouse effect traps heat in the troposphere through process of absorbing different levels of radiation. GHG are effective in absorbing radiation which would otherwise escape back to space. Therefore, the greater the amount of radiation absorbed, the greater the warming potential of the atmosphere. GHG are created through natural process and/or industrial processes. These gases include water vapor (H2O), carbon dioxide (CO2), methane (CH4), nitrous oxide (N2O), hydrofluorocarbons (HFCs),...
Perfluorocarbons (PFCs), and sulfur hexafluoride (SF6).

The United States Environmental Protection Agency (EPA) identifies the following four primary constituents that represent the greenhouse gas emissions of most importance:

- **Carbon Dioxide (CO2):** CO2 is primarily generated by the burning of fossil fuels. Other sources include burning of solid waste and wood products.
- **Methane (CH4):** CH4 is emitted from the incomplete combustion of forest fires, landfills, livestock and animal land uses, and leaks in natural gas lines.
- **Nitrous Oxide (N2O):** N2O is produced by agricultural and industrial activities.
- **Fluorinated Gases (HFCs and PFCs):** These gases are emitted from industrial activities and refrigerants used in both stationary refrigeration and mobile air conditioning.

The US EPA estimates nearly 85% of the nation's GHG emissions are comprised of carbon dioxide. For most nonindustrial development projects, motor vehicles make up the bulk of GHG emissions. According to the California Air Resources Board, the primary GHG emitted by vehicles are CO2, CH4, N2O, and HFCs.

Since 2005, the California legislator has adopted several bills, and the Governor has signed several Executive Orders, in response to the impacts related to global warming. Assembly Bill 32 states global warming poses a serious threat to California and directs the Air Resources Board to develop and adopt regulations that reduce GHG emissions to 1990 levels by the year 2020. Senate Bill 97 requires an assessment of a project's GHG emissions as part of the CEQA process. SB 97 also required the Office of Planning and Research to develop guidelines to analyze GHG emissions.

The NSAQMD has not adopted thresholds of significance for GHG emissions. Additionally, CARB has not yet adopted any tools to measure the impact of a project on global warming. Due to the nature of global climate change, it is not anticipated that a single project would have substantial impact on the global climate change. Although it is possible to estimate a project's CO2 emissions, it is not possible to determine whether or how an individual project's relatively small incremental contribution might translate into physical effects on the environment. Specifically, the URBEMIS model indicates this project would emit approximately 437.85 tons of CO2 annually. This number does not consider the project design and mitigation measures which will reduce this number. The project's emissions represent less than 0.0000037 percent of the projected statewide GHG emissions in the year 2010. Given the complex interactions between various global and regional-scale physical, chemical, atmospheric, terrestrial, and aquatic systems, it is not possible to determine whether the project's CO2 emissions would result in any altered conditions. Therefore, an individual project's GHG emissions must be considered in the global and statewide context. This requires GHG emissions to be considered in a cumulative context.

Even though we are unable to quantify the level of impact a project may have on global climate changes, an applicant and the City can take steps to reduce GHG emissions on a project by project basis. The applicant has incorporated a number of energy efficient measures and designed the project to include many smart growth principles. Within the Project Summary document, the applicant also identifies other measures which will reduce GHG emissions. These measures are consistent with the California State Attorney General's Office, which provides guidance on methods for reducing GHG emissions. The Attorney General's document titled "Addressing Climate Change at the Project Level" includes recommendations for energy efficient buildings, appliances, heating and cooling systems, passive solar, energy efficient lighting, water conservation and landscaping, and many other design and operational measures that can reduce GHG emissions. Specific examples this project incorporates include a site design providing good southern exposure for most of the buildings, clustering buildings to reduce impacts on the land and preserve trees and native vegetation. Furthermore, Section 10 of this study discusses the City's General Plan and Development Code policies and standards that support the AG's guidelines.

**Conclusion:**
Given there are no state, regional, or local threshold to objectively determine the level of impact created by an individual project, and that this project would generate less than a 0.0000037 percent unmitigated increase in GHG emissions, the project is expected to result in an impact that is less than significant. Additionally, some air districts have estimated a CO2 reduction factor for specific project design features and mitigation measures.

**Mitigation:**

6. All buildings shall include energy efficient indoor and outdoor lighting and light colored "cool" roofs.
   a. At least 75% of the landscaping within the open space and common areas shall include native and/or drought tolerant...
landscaping. Shade trees shall be provided at a rate of one for every 25 linear feet of landscaped area.
b. Size & orientation of windows & doors shall be designed to take advantage of sun, shade & wind conditions to minimize the requirement on mechanical heating and cooling systems. Site buildings to take advantage of solar orientation. Proper building orientation facilitates the use of natural daylight.
c. Incorporate Natural Cooling by utilizing shading from tree canopies (for east & west facing glass). Any combination of natural cooling techniques can be used to reduce overheating, reduce the need for air conditioning and reduce energy.
d. All windows shall be Energy Star rated.
e. Upgrade insulation to exceed California Title 24 requirements.

h. Expose people of structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?  

Discussion of Checklist Answers:
The property is not listed as a hazardous materials site. The parcels are not located near any schools. The Nevada County Airport is located to the east of the property; however, the project site is not located within any of the four safety zones. The project will not physically interfere with an adopted emergency response plan or emergency evacuation plan. The property has a significant amount of vegetation which could expose people and structures to wildland fire hazards. The project will be required to reduce ladder fuels and dead vegetation as part of the standard Fire Department requirements.

The geotechnical report noted a potential concern regarding a possible open vertical shaft on the western portion of property. The site appears to be located over 100 feet from the proposed retaining wall and building site. The shaft will need to be excavated and a determination made on how to mitigate by either over excavation with removal of debris or capped with a concrete plug.

Conclusion:
Impacts associated with hazards and hazardous materials are considered less than significant.

Mitigation:
7. Prior to the issuance of any grading or building permits, the possible open vertical mine shaft on the western side of the project shall be excavated and evaluated by a Geotechnical Engineer to determine the proper method for closing/sealing shaft.

<td></td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
The project site, as with a majority of the City, is located within the Wolf Creek Drainage Basin. Wolf Creek is located 600 feet to the north of the project site. The property has an intermittent tributary and seasonal riparian area which has been delineated by the Army Corp of Engineers. The FIRM map produced by the Federal Emergency Management Agency did not identify the project site as being located in the 100-year floodplain that could expose people or property to flooding. The project will not utilize ground water and therefore should not impact the flow, quality, or loss of ground water. The project will require grading and the addition of approximately 139,984 square feet of new impervious surfaces (41% of the property) to accommodate the proposed development. The project proposes to collect all storm water runoff and direct it through two storm drain conduits into stormceptors and then dispersed into drainage along Whispering Pines Lane (along northwest) and along the south side into natural drainage. The storm water detention facilities are proposed in pipes under the parking lot and would be designed so as to maintain pre-development storm water runoff. The runoff from the site may contain grease, oil and other petroleum by-product, as well as other sediments that may have the potential of impacting the Wolf Creek watershed. The City will require grease, oil and other petroleum by-product separators to be installed at the drainage inlets to prevent the pollutants from entering the storm water detention facility. The project may have short term impacts associated with sediment and run off during grading and construction. The project will be required to comply with the City’s Storm Water Management Plans which incorporates “Best Management Practices” (BMP’s) during the development of the property.

Onsite drainage to be directed to one of the two onsite drainage collection/detention systems and will be released at pre-development flow rates to the original basin.

Conclusion
With the inclusion of the City’s standard conditions for storm water management, impacts associated with hydrology and water quality are considered less than significant.

Mitigation: None Required
## 10. LAND USE PLANNING

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>

**Discussion of Checklist Answers:**

The project site is currently located within the unincorporated area of Nevada County. The 7.73 acre site is located adjacent to the City of Grass Valley city limits and is within the City’s Sphere of Influence. The project includes an application for Annexation into the City and Prezone from the County’s BP zoning to the City’s M-1 (Light Industrial). The applicant has also applied for a General Plan Amendment to establish consistency between the zoning designation and the general plan. The City’s BP zoning designation does not allow for the manufacturing/light industrial that the applicant has designated for this development. The proposal represents a logical expansion which was planned for within the Sphere of Influence and would not divide an established community. The area has not been used for agricultural purposes nor is it near any farming locations. The site is not near any habitat conservation plan or natural community conservation plan. Included below are General Plan goals and policies as they relate to avoidance of, or mitigation of environmental effects and references to sections of the Development Code.

### Land Use Element:

10- LUP Annex properties within the Grass Valley Planning Area prior to or in conjunction with their development.

29- LUP Promote the establishment and expansion of the businesses and industries offering professional, light manufacturing and technical employment opportunities related to the existing and developing forms of technology.

### Circulation Element:

1-COSG Provide and balance between development and the natural environment, protecting and properly utilizing Grass Valley’s sensitive environmental areas/features, natural resource and open space lands. COSO objectives 1, 2, 3, 4, 5, and 6-COSO include statements for minimizing impacts to sensitive and natural resources.

2-COSG Protect, enhance and restore hydrologic features, including stream corridors, flood plains, wetlands, and riparian zones.

6-COSG Assure compliance with and understanding of air and water quality regulations and standards.

7-CO Use of City standards throughout the Planning Area.

10-CO Protection of stream courses, riparian areas and other natural features.

13-CO Improvement of the transportation system to facilitate commerce and economic development.

### Safety Element:

8-SP Incorporate fire hazard reduction considerations into land use plan/patterns, both public and private.

8-SI Require new developments to utilize on-site storm water detention techniques.

9-SI Establish site development standards designed to minimize the resulting area and percentage of impervious surface.

### Community Design Policies:
14-CDP Integrate natural areas for runoff detention in all major new development.
17-CDP Assure adequate City design review of all new development.

The Grass Valley Development Code includes other chapters that apply to this project as well. Chapter 17.54 relating to Hillside and
Ridgeline Development, and Chapter 17.34 for Landscaping Standards. Chapter 17.62 includes the standards for grading and erosion
control.

Conclusion:
In response to the General Plan goals, objectives, and policies as they relate to avoiding or mitigating environmental effect as well as the
key chapters of the Development Code that need to be addressed during the review and approval process. Impacts associated with land
use and planning are considered less than significant.

Mitigation: No mitigation is required for the land use section.

<tr>
<td>11. MINERAL RESOURCES.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Would the project:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?</td>
<td></td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
The General Plan Mineral Management Element states a good portion of the City is classified as having significant mineral deposits; but also notes there is limited opportunity to mine these areas because of the existing incompatible urban development. This property is located adjacent to one of the two areas identified in the Mineral Management Element as being targeted for mining conservation. However, the proposed M-1 uses are considered compatible with potential mining activities.

Conclusions:
Impacts associated with mineral resources are considered less than significant.

Mitigation:
No mitigation measure would be required.

<table>

<tbody>
<tr>
<td>12. NOISE.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Would the project result in:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Discussion of Checklist Answers:

The General Plan Noise Element establishes maximum allowable noise levels for different types of land uses. The project site is currently vacant and has residential uses to the southeast. Temporary noise will occur during construction. The City has established hours for construction which will minimize the neighbors exposure to the construction noise. Once completed, the project can be expected to generate traffic related noise, and noise related to truck deliveries of products to the site. However, the vehicle-related noises will be limited to occasional deliveries and not create constant noise levels. The project site is not located within an airport land use plan or near a private or public airport.

### Conclusion:

Impacts associated with noise are considered less than significant.

### Mitigation:

No mitigation measures would be required.

---

---

Annexation (10PLN-19), General Plan Amendment (10PLN-21), Prezone (10PLN-20) and Development Review (10DRC-19)
### Public Services

1. **Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:**

   a. Fire protection?

   i. Yes

   b. Police protection?

   i. Yes

   c. Schools?

   i. Yes

   d. Parks?

   i. Yes
<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less-Than-Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>v. Other Public Facilities?</td>
<td></td>
<td></td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
The project is located within the city limits of Grass Valley, and within the service boundaries of the City. The project would be served by the City of Grass Valley Fire and Police Departments. With proper fire prevention measures as required under the Uniform Building Code and Uniform Fire Code, the project is not expected to significantly impact Fire Department services. Payment of new development fees will address the project's impact on City Fire and Police Department Services. The project will be required to pay the adopted school impact fees and therefore, not impact schools. The project will not require the need for new maintenance of new public facilities or roads. No significant impact on public services is anticipated with this project. No mitigation measures would be required for the public services section.

Conclusion:
Impacts associated with public services are considered less than significant.

Mitigation:
No mitigation measures would be required

<table>
<thead>
<tr>
<th>15. RECREATION.</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Would the Project:</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>b. Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
The development of proposed project would not have a significant impact on the recreational opportunities or demand in the City of Grass Valley. The City's Parks and Recreation Master Plan does not show any planned park sites on the property although there is a proposed trail which connects Whispering Pines Lane out to East Bennett and along to Kidder Avenue. While the City Park and Recreation Master Plan has been adopted, a formal Trail Master Plan and Design Guidelines have not been defined

Conclusion:
With no staffing or funding, the Trails Master Plan and Design Guidelines are considered only recommendations. The trail system would need to be implemented in order to allow commercial and residential areas to be connected. Impacts associated with recreation are considered less than significant.

Mitigation:
No mitigation measures would be required for the recreation section.
<table>

</tr>
</thead>
<tbody>
<tr>
<td>16. TRANSPORTATION/TRAFFIC</td>
<td>Would the proposal:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>a. Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>b. Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>d. Substantially increase hazards due to a design feature (e.g., sharp curves of dangerous intersections) or incompatible uses (e.g., farm equipment)?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>e. Result in inadequate emergency access?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>f. Result in inadequate parking capacity?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>g. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
Based on the Traffic Analysis prepared by TJKM on January 25, 2011, the project is expected to generate 56 trips occurring during the p.m. peak hour. The City’s traffic policy requires traffic reports for projects that are estimated to generate more than 50 p.m. peak hour vehicle trips and are not consistent with the General Plan. The traffic analysis concluded that the intersections that would be utilized with this project would continue to operate at an acceptable Level of Service “C” (LOS) and would not be considered significant per the City of Grass Valley Guidelines. Projects that generate less than this are considered less than significant but will pay AB 1600 traffic fees. The project does not affect air traffic patterns. No increase in traffic hazards are expected and the property has adequate emergency access. The Development Code requires 136 parking spaces for the uses on site, and the applicant proposes 169 spaces. The project does not conflict with any adopted policies, plans or programs.

Conclusion:
The Traffic Analysis/Study showed the traffic impacts to be less than significant which would not require a Comprehensive Traffic Impact Study. It is recommended and will be required by the City of Grass Valley that all applicable associated traffic fees for Regional Transportation and Grass Valley transportation be paid at time of building permit issuance. Impacts associated with traffic and circulation are considered less than significant.

Mitigation:
No mitigation measure required.

<td></td>
</tr>
<tr>
<td>g. Comply with federal, state, and local statutes and regulations related to solid waste?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

**Discussion of Checklist Answers:**
The project will require connections to the existing water, sewer, storm drainage power, and communication systems. All these systems and utilities are available to the site. The property is within the Nevada Irrigation District service area and will need to be annexed into the district boundary. Waste Management provides solid waste service to the City. The project will be connected to the City's sewer system. The City has approved development projects involving potential increased demands on the City's waste water treatment plant, recognizing the potential limits on sewer availability. However, specific approval to connect to the sewer system must be obtained from the City at the time of building permit issuance. The project will be required to provide for on-site storm water detention pursuant to the City's standard conditions of approval.

**Conclusion:**
No significant impact on utilities is anticipated with this project.

**Mitigation:**
No mitigation measures would be required for the utility services section.
18. MANDATORY FINDINGS OF SIGNIFICANCE

<table>
<thead>
<tr>
<th>Issues</th>
<th>Potentially Significant Impact</th>
<th>Less Than Significant With Mitigation Incorporated</th>
<th>Less Than Significant Impact</th>
<th>No Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife species population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?</td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>b. Does the project have impacts that are individually limited, but cumulatively considerable? (&quot;Cumulatively considerable&quot; means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, and the effects of probable future projects)</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?</td>
<td></td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

Discussion of Checklist Answers:
As discussed in sections 1 through 16 above, the project, as mitigated, will not impact habitat of a fish, wildlife or plant species, nor will it create substantial adverse impacts on human beings. The project as mitigated, it is not expected to create significant impacts on the environment. The project will not create cumulative impacts with the inclusion of the mitigation measures, by complying with the City's development standards, and by paying appropriate AB1600 fees.

Conclusion:
The project, as mitigated, will not create a significant adverse impact on the environment.

Addendum to
Mitigated Negative Declaration
For Annexation 10PLN-19, Prezone 10PLN-20, General Plan Amendment 10PLN-21, and Development Review Application 10DRC-19

In accordance with Section 15073.5 of the California Environmental Quality Act, the City of Grass Valley is required to recirculate a negative declaration when the document must be substantially revised after public notice of its availability. However, recirculation is not required if new information is added which merely clarifies, amplifies, or make insignificant modifications to the negative declaration. Under section 15073.5 the City must determine if the change is a substantial revision to the proposed negative declaration, and therefore be recirculated. A substantial revision occurs when a new, avoidable significant effect is identified or when new mitigation measures are required to address potential new impacts. If the change results in a substantial revision, recirculation of the document is required.

Proposed information to be added to the negative declaration:

1. Page 7, Under Air Quality, after fourth paragraph, Ozone is created by a photochemical reactive process created when sunlight reacts with reactive organic gasses creating VOC's (volatile organic compounds). There are created primarily outside our air district and then carried into the local area.
2. Page 8, Last sentence above "Conclusion" The largest source of ozone is carried into the Northern Sierra Air District from larger urban areas such as the Sacramento Valley and the Bay Area. Implementation of standard level "B" measures will help to reduce the precursors.
3. Page 8, Construction emissions would generate 61.63 lbs. of Oxides of Nitrogen (NOx) per day and 62.83 lbs. of Reactive Organic Gases (ROG) per day. The potentially significant threshold for emissions is 24lbs per day. If Tier 2 (Level "B") measures are used, the levels produced will be below the significant threshold emission Level "C" of 136 lbs per day.
4. Page 17, first paragraph –The project proposes to collect all storm water runoff and direct it through two storm drain conduits into stormceptors and then dispersed into drainage along Whispering Pines Lane and along the south side into natural drainage. Easements will be required for drainage onto neighboring parcels.
Based on the above additions, no subsequent environmental analysis is required because:
1. The changes to the text are minor in nature, not considered substantial, will not result in new significant environmental effects not previously considered, and therefore do not require major revisions to the proposed negative declaration;
2. The new information simply clarifies and makes an insignificant modification to the negative declaration; and
3. None of the proposed mitigation measures would need to be altered to reflect the text changes.

Minor typographical corrections were made

Therefore, the proposed changes are considered minor and would not require recirculation pursuant to the California Environmental Quality Act section 15073.5.
